Guide to Nebraska's Wetlands and their conservation needs

Enclosed is a copy of *Guide to Nebraska's Wetlands and their conservation needs*. This publication was completed by Ted LaGrange, Nebraska Game and Parks Commission's Wetland Program Manager. Funding for this publication was provided by Nebraska Game and Parks Commission, Ducks Unlimited, and the United States Environmental Protection Agency. This publication includes information regarding importance, dynamics, classification, restoration, and management of wetland areas. The resource also contains information about the different wetland complexes in Nebraska and their status based on past losses and future threats. A list of references cited within the text, and a glossary are also found in the back of the publication. This publication can be very useful as a reference for wetland conservation activities performed by the NRCS.
