**National Priorities Addressed**

Issue Questions	Responses
<p>If the application is for development of a Conservation Activity Plan (CAP), the agency will assign significant ranking priority and conservation benefit by answering “Yes” to the following question. Answering “Yes” to question 1a will result in the application being awarded the maximum amount of points that can be earned for the national priority category.</p>	
<p>1. a. Is the program application to support the development of a Conservation Activity Plan (CAP)? If answer is “Yes”, do not answer any other national level questions. If answer is “No”, proceed with evaluation to address the remaining questions in this section.</p>	<p>250 Point(s)</p>
<p>Water Quality Degradation – Will the proposed project improve water quality by: (select all that apply)</p>	
<p>2. a. Implementing the practices in a Comprehensive Nutrient Management Plan (CNMP)?</p>	<p>15 Point(s)</p>
<p>2. b. Implementing the practices in a Nutrient Management Plan (NMP)?</p>	<p>10 Point(s)</p>
<p>2. c. Reducing impacts from sediment, nutrients, salinity, or pesticides on land adjoining a designated “impaired water body” (TMDL, 303d listed waterbody, or other State designation)?</p>	<p>10 Point(s)</p>
<p>2. d. Reducing the impacts from sediment, nutrients, salinity, or pesticides in a “non-impaired water body”?</p>	<p>10 Point(s)</p>
<p>2. e. Implementing practices that improve water quality through animal mortality and carcass management?</p>	<p>10 Point(s)</p>
<p>Water Conservation – Will the proposed project conserve water by: (select all that apply)</p>	

3. a. Implementing irrigation practices that reduce aquifer overdraft.	15 Point(s)
3. b. Implementing irrigation practices that reduce on-farm water use?	10 Point(s)
3. c. Implementing practices in an area where the applicant participates in a geographically established or watershed-wide project?	10 Point(s)
3. d. Implementing practices that reduce on-farm water use as a result of changing to crops with lower water consumptive use, the rotation of crops, or the modification of cultural operations?	10 Point(s)
Air Quality - Will the proposed project improve air quality by: (select all that apply)	
4. a. Meeting on-farm regulatory requirements relating to air quality or proactively avoid the need for regulatory measures?	10 Point(s)
4. b. Implementing practices that reduce on-farm emissions of particulate matter (PM2.5, PM10)?	10 Point(s)
4. c. Implementing practices that reduce on-farm generated greenhouse gases such as carbon dioxide (CO2), methane (CH4), and nitrous oxide (N2O)?	10 Point(s)
4. d. Implementing practices that increase on-farm carbon sequestration?	10 Point(s)
Soil Health:- Will the proposed project improve soil health by: (select all that apply)	
5. a. Reduce erosion to tolerable limits (Soil "T")?	10 Point(s)
5. b. Increasing organic matter and carbon content, and improving soil tilth and structure?	10 Point(s)
Wildlife Habitat – Will the proposed project improve wildlife habitat by: (select all that apply)	
6. a. Implementing practices benefitting threatened and endangered, at-risk, candidate, or species of concern.	10 Point(s)
6. b. Implementing practices that retain wildlife and plant habitat on land exiting the Conservation Reserve Program (CRP) or other set-aside program?	10 Point(s)
6. c. Implementing practices benefitting honey bee populations or other pollinators?	10 Point(s)
6. d. Implementing land-based practices that improve habitat for aquatic wildlife?	10 Point(s)

Plant and Animal Communities: Will the proposed project improve plant and animal communities by: (select all that apply)	
7. a. Implementing practices that result in the management control of noxious or invasive plant species on non-cropland?	10 Point(s)
7. b. Implementing practice in an Integrated Pest Management Plan (IPM)?	10 Point(s)
Energy Conservation– Will the proposed project reduce energy use by: (select all that apply)	
8. a. Reducing on-farm energy consumption?	10 Point(s)
8. b. Implementing practice(s) identified in an approved AgEMP or energy audit, which meet ASABE S612 criteria?	10 Point(s)
Business Lines – Will the practices to be scheduled in the “EQIP Plan of Operations” result in:	
9. a. Enhancement of existing conservation practice(s) or conservation systems already in place at the time the application is received?	10 Point(s)

**State Issues Addressed**

<b>Issue Questions</b>	<b>Responses</b>
1. Is the program application to support the development of a Conservation Activity Plan (CAP)? If answer is “Yes”, do not answer any other state level questions. If answer is “No”, proceed with evaluation to address the remaining <u>questions in this section.</u>	250 Point(s)
2. Will the treatment you intend to implement using EQIP result in the protection and improvement to the resource base on all grazing <u>lands in the contract?</u>	24 Point(s)
3. Will the treatment you intend to implement using EQIP result in improved soil quality with the use of either no-till or a resource conserving crop rotation on at least 50% of the land in the contract? See CSP enhancement CCR99 for conserving crop rotation definition.	16 Point(s)
4. Will the treatment you intend to implement using EQIP result in improved water quality?	14 Point(s)
5. Does the applicant who is applying for EQIP qualify for Limited Resource status?	24 Point(s)

6. Will the treatment you intend to implement using EQIP result in the use of variable rate technologies for nutrient application using computer controlled equipment that adjusts fertilizer application based on management zones or grids?	5 Point(s)
7. Will the treatment you intend to implement using EQIP directly benefit a Federal or State listed, threatened, endangered or candidate species as identified in the State wildlife plan (Nebraska Natural Legacy Project)?	26 Point(s)
8. Will the treatment you intend to implement using EQIP result in a considerable reduction in an invasive plant species which has been identified as a statewide concern?	11 Point(s)
9. Will the treatment you intend to implement using EQIP result in the collection and use of livestock manure or city sludge from a CNMP for beneficial uses?	10 Point(s)
10. Will the treatment you intend to implement using EQIP result in wetlands being created, restored or enhanced?	9 Point(s)
11. Will the treatment you intend to implement using EQIP identified in an air quality assessment which will result in improved air quality?	5 Point(s)
12. Will the treatment you intend to implement using EQIP result in pollinator habitat being created or improved? Practice applied result in plantings which include milkweed species among a diverse mix of flowering plants. (Practice 327 Conservation Cover, Pollinator criteria as noted in 645 Upland Wildlife Habitat Management)	9 Point(s)
13. Will the treatment you intend to implement using EQIP result in a tree and/or shrub planting for conservation purposes?	11 Point(s)
14. Will the treatment you intend to implement using EQIP be applied on recently expired CRP, maintaining the CRP cover for the purpose of wildlife habitat, grazing or haying?	31 Point(s)
15. Will the irrigation system improvement you intend to implement using EQIP result in estimated water savings of at least 40% if located within an over appropriated river basin?	9 Point(s)

16. If the applicant who is applying for EQIP is also a previous/present contract holder or has been associated with a contract, has the applicant ever had a contract out of compliance or modified to reschedule a practice without a meritorious reason? Meritorious reason examples include personal hardship, adverse weather conditions, etc.	-25 Point(s)
17. Will the treatment you intend to implement using EQIP result in wind and water erosion control to "T" on all cropland in the contract?	26 Point(s)
18. Is the treatment you intend to implement identified in an current farm plan?	15 Point(s)
19. Will the treatment you intend to implement support the National Soil Health Initiative by including all five of the soil health practices: 1) cover crops (340); 2) no-till (329); 3) conservation crop rotation (328); 4) nutrient management (590); and integrated pest management (595)? If yes do not answer questions 20 and 21.	15 Point(s)
20. Will the treatment you intend to implement support the National Soil Health Initiative by including three of the five soil health practices: 1) cover crops (340); 2) no-till (329); 3) conservation crop rotation (328); 4) nutrient management (590); and integrated pest management (595)? If yes do not answer questions 19 and 21.	10 Point(s)
21. Will the treatment you intend to implement support the National Soil Health Initiative by including at least one of the five soil health practices: 1) cover crops (340); 2) no-till (329); 3) conservation crop rotation (328); 4) nutrient management (590); and integrated pest management (595)? If yes do not answer questions 19 and 20.	5 Point(s)

**Local Issues Addressed**

Issue Questions	Responses
Is the program application to support the development of a Conservation Activity Plan (CAP)?	
1. Is the program application to support the development of a Conservation Activity Plan (CAP)? If answer is "Yes", do not answer any other local level questions. If answer is "No", proceed with evaluation to address the remaining questions in this section.	400 Point(s)

Will the treatment you intend to implement using EQIP result in conversion from irrigated land to non-irrigated cropland on:	
2. 13% or greater of total cropland in the contract? ((non-irrigated cropland / total cropland in contract) * 100)	17 Point(s)
3. 10.00 - 12.99% of total cropland in the contract? ((non-irrigated cropland / total cropland in contract) * 100)	13 Point(s)
4. 7.00 - 9.99% of total cropland in the contract? ((non-irrigated cropland / total cropland in contract) * 100)	9 Point(s)
5. 3.00 - 6.99% of total cropland in the contract? ((non-irrigated cropland / total cropland in contract) * 100)	5 Point(s)
6. 0.01 - 2.99% of total cropland in the contract? ((non-irrigated cropland / total cropland in contract) * 100)	1 Point(s)
Will the treatment you intend to implement using EQIP result in conversion from irrigated land to non-irrigated permanent vegetation on:	
7. 13% or greater of total land in the contract? ((non-irrigated permanent vegetation / total land in contract) * 100)	36 Point(s)
8. 10.00 - 12.99% of total land in the contract? ((non-irrigated permanent vegetation / total land in contract) * 100)	30 Point(s)
9. 7.00 - 9.99% of total land in the contract? ((non-irrigated permanent vegetation / total land in contract) * 100)	24 Point(s)
10. 3.00 - 6.99% of total land in the contract? ((non-irrigated permanent vegetation / total land in contract) * 100)	18 Point(s)
11. 0.01 - 2.99% of total land in the contract? ((non-irrigated permanent vegetation / total land in contract) * 100)	12 Point(s)
Will the treatment you intend to implement using EQIP result in irrigation system efficiency improvements by utilizing:	
12. Advanced soil moisture monitoring techniques on each sprinkler or gravity irrigation system in the contract?	17 Point(s)
13. Intermediate soil moisture monitoring techniques on each sprinkler or gravity irrigation system in the contract?	9 Point(s)
Will the treatment you intend to implement using EQIP be located in the TBNRD water quantity:	
14. Phase 3 area?	80 Point(s)
15. Phase 2 area?	60 Point(s)

Will the treatment you intend to implement using EQIP be located in the TBNRD water quality:	
16. Phase 3 area?	40 Point(s)
17. Phase 2 area?	20 Point(s)
Will the treatment you intend to implement using EQIP:	
18. Result in no-till with no row cultivation and no more than 25% total ground disturbance related to fertilizing, planting, etc. on all cropland in the contract?	6 Point(s)
Does the applicant applying for EQIP qualify as a Beginning Farmer?	
19. Does the applicant applying for EQIP qualify as a Beginning Farmer?	3 Point(s)

Issue Questions	Responses
If the application is for development of a Conservation Activity Plan (CAP), the agency will assign significant ranking priority and conservation benefit by answering “Yes” to the following question. Answering “Yes” to question 1a will result in the application being awarded the maximum amount of points that can be earned for the national priority category.	
1. a. Is the program application to support the development of a Conservation Activity Plan (CAP)? If answer is “Yes”, do not answer any other national level questions. If answer is “No”, proceed with evaluation to address the remaining questions in this section.	250 Point(s)
Water Quality Degradation – Will the proposed project improve water quality by: (select all that apply)	
2. a. Implementing the practices in a Comprehensive Nutrient Management Plan (CNMP)?	15 Point(s)
2. b. Implementing the practices in a Nutrient Management Plan (NMP)?	10 Point(s)
2. c. Reducing impacts from sediment, nutrients, salinity, or pesticides on land adjoining a designated “impaired water body” (TMDL, 303d listed waterbody, or other State designation)?	10 Point(s)
2. d. Reducing the impacts from sediment, nutrients, salinity, or pesticides in a “non-impaired water body”?	10 Point(s)
2. e. Implementing practices that improve water quality through animal mortality and carcass management?	10 Point(s)
Water Conservation – Will the proposed project conserve water by: (select all that apply)	

3. a. Implementing irrigation practices that reduce aquifer overdraft.	15 Point(s)
3. b. Implementing irrigation practices that reduce on-farm water use?	10 Point(s)
3. c. Implementing practices in an area where the applicant participates in a geographically established or watershed-wide project?	10 Point(s)
3. d. Implementing practices that reduce on-farm water use as a result of changing to crops with lower water consumptive use, the rotation of crops, or the modification of cultural operations?	10 Point(s)
Air Quality - Will the proposed project improve air quality by: (select all that apply)	
4. a. Meeting on-farm regulatory requirements relating to air quality or proactively avoid the need for regulatory measures?	10 Point(s)
4. b. Implementing practices that reduce on-farm emissions of particulate matter (PM2.5, PM10)?	10 Point(s)
4. c. Implementing practices that reduce on-farm generated greenhouse gases such as carbon dioxide (CO2), methane (CH4), and nitrous oxide (N2O)?	10 Point(s)
4. d. Implementing practices that increase on-farm carbon sequestration?	10 Point(s)
Soil Health:- Will the proposed project improve soil health by: (select all that apply)	
5. a. Reduce erosion to tolerable limits (Soil "T")?	10 Point(s)
5. b. Increasing organic matter and carbon content, and improving soil tilth and structure?	10 Point(s)
Wildlife Habitat – Will the proposed project improve wildlife habitat by: (select all that apply)	
6. a. Implementing practices benefitting threatened and endangered, at-risk, candidate, or species of concern.	10 Point(s)
6. b. Implementing practices that retain wildlife and plant habitat on land exiting the Conservation Reserve Program (CRP) or other set-aside program?	10 Point(s)
6. c. Implementing practices benefitting honey bee populations or other pollinators?	10 Point(s)
6. d. Implementing land-based practices that improve habitat for aquatic wildlife?	10 Point(s)

Plant and Animal Communities: Will the proposed project improve plant and animal communities by: (select all that apply)	
7. a. Implementing practices that result in the management control of noxious or invasive plant species on non-cropland?	10 Point(s)
7. b. Implementing practice in an Integrated Pest Management Plan (IPM)?	10 Point(s)
Energy Conservation– Will the proposed project reduce energy use by: (select all that apply)	
8. a. Reducing on-farm energy consumption?	10 Point(s)
8. b. Implementing practice(s) identified in an approved AgEMP or energy audit, which meet ASABE S612 criteria?	10 Point(s)
Business Lines – Will the practices to be scheduled in the “EQIP Plan of Operations” result in:	
9. a. Enhancement of existing conservation practice(s) or conservation systems already in place at the time the application is received?	10 Point(s)

**State Issues Addressed**

17. Will the treatment you intend to implement using EQIP result in wind and water erosion control to "T" on all cropland in the contract?	26 Point(s)
18. Is the treatment you intend to implement identified in an current farm plan?	15 Point(s)
19. Will the treatment you intend to implement support the National Soil Health Initiative by including all five of the soil health practices: 1) cover crops (340); 2) no-till (329); 3) conservation crop rotation (328); 4) nutrient management (590); and integrated pest management (595)? If yes do not answer questions 20 and 21.	15 Point(s)
20. Will the treatment you intend to implement support the National Soil Health Initiative by including three of the five soil health practices: 1) cover crops (340); 2) no-till (329); 3) conservation crop rotation (328); 4) nutrient management (590); and integrated pest management (595)? If yes do not answer questions 19 and 21.	10 Point(s)
21. Will the treatment you intend to implement support the National Soil Health Initiative by including at least one of the five soil health practices: 1) cover crops (340); 2) no-till (329); 3) conservation crop rotation (328); 4) nutrient management (590); and integrated pest management (595)? If yes do not answer questions 19 and 20.	5 Point(s)

**Local Issues Addressed**

Issue Questions	Responses
Is the program application to support the development of a Conservation Activity Plan (CAP)?	
1. Is the program application to support the development of a Conservation Activity Plan (CAP)? If answer is "Yes", do not answer any other local level questions. If answer is "No", proceed with evaluation to address the remaining questions in this section.	400 Point(s)

Will the treatment you intend to implement using EQIP result in conversion from irrigated land to non-irrigated cropland on:	
2. 15% or greater of total cropland in the contract? ((non-irrigated cropland / total cropland in contract) * 100)	20 Point(s)
3. 10.00 - 14.99% of total cropland in the contract? ((non-irrigated cropland / total cropland in contract) * 100)	13 Point(s)
4. 5.00 - 9.99% of total cropland in the contract? ((non-irrigated cropland / total cropland in contract) * 100)	7 Point(s)
5. 0.01 - 4.99% of total cropland in the contract? ((non-irrigated cropland / total cropland in contract) * 100)	2 Point(s)
Will the treatment you intend to implement using EQIP result in conversion from irrigated land to non-irrigated permanent vegetation on:	
6. 15% or greater of total land in the contract? ((non-irrigated permanent vegetation / total land in contract) * 100)	28 Point(s)
7. 10.00 - 14.99% of total land in the contract? ((non-irrigated permanent vegetation / total land in contract) * 100)	21 Point(s)
8. 5.00 - 9.99% of total land in the contract? ((non-irrigated permanent vegetation / total land in contract) * 100)	15 Point(s)
9. 0.01 - 4.99% of total land in the contract? ((non-irrigated permanent vegetation / total land in contract) * 100)	10 Point(s)
Will the treatment you intend to implement using EQIP result in the installation of a micro irrigation system that will prevent gully erosion from irrigation runoff directly below the existing gravity irrigated field on slopes of:	
10. 10% or greater (use best judgment off the soil survey)?	141 Point(s)
11. 6 - 9.99% (use best judgment off the soil survey)?	93 Point(s)
12. 3 - 5.99% (use best judgment off the soil survey)?	48 Point(s)
13. 2.99% or less (use best judgment off the soil survey)?	6 Point(s)
Will the treatment you intend to implement using EQIP:	
14. Be located within a TBNRD resource concern area? (Water Short Township or Republican River Basin)	18 Point(s)

15. Improve irrigation efficiency by utilizing soil moisture monitoring techniques on each micro irrigation system in the contract?	8 Point(s)
16. Result in no-till with no row cultivation and no more than 25% total ground disturbance related to fertilizing, planting, etc. on all cropland in the contract?	10 Point(s)
17. Result in a TSP designed micro irrigation system?	13 Point(s)
Will the treatment you intend to implement using EQIP result in conversion from non-irrigated land to irrigated land on:	
18. 0.01 - 3.00% of total irrigated land in the contract? ((new irrigated land / total irrigated land in contract) * 100)	-22 Point(s)
19. 3.01 - 5.00% of total irrigated land in the contract? ((new irrigated land / total irrigated land in contract) * 100)	-39 Point(s)
Will the treatment you intend to implement using EQIP result in a Cover Crop being implemented?	
22. Will the treatment you intend to implement using EQIP result in a Cover Crop being implemented?	5 Point(s)
Does the applicant applying for EQIP qualify as a beginning farmer?	
23. Does the applicant applying for EQIP qualify as a beginning farmer?	3 Point(s)

Issue Questions	Responses
If the application is for development of a Conservation Activity Plan (CAP), the agency will assign significant ranking priority and conservation benefit by answering “Yes” to the following question. Answering “Yes” to question 1a will result in the application being awarded the maximum amount of points that can be earned for the national priority category.	
1. a. Is the program application to support the development of a Conservation Activity Plan (CAP)? If answer is “Yes”, do not answer any other national level questions. If answer is “No”, proceed with evaluation to address the remaining questions in this section.	250 Point(s)
Water Quality Degradation – Will the proposed project improve water quality by: (select all that apply)	
2. a. Implementing the practices in a Comprehensive Nutrient Management Plan (CNMP)?	15 Point(s)
2. b. Implementing the practices in a Nutrient Management Plan (NMP)?	10 Point(s)
2. c. Reducing impacts from sediment, nutrients, salinity, or pesticides on land adjoining a designated “impaired water body” (TMDL, 303d listed waterbody, or other State designation)?	10 Point(s)
2. d. Reducing the impacts from sediment, nutrients, salinity, or pesticides in a “non-impaired water body”?	10 Point(s)
2. e. Implementing practices that improve water quality through animal mortality and carcass management?	10 Point(s)
Water Conservation – Will the proposed project conserve water by: (select all that apply)	

3. a. Implementing irrigation practices that reduce aquifer overdraft.	15 Point(s)
3. b. Implementing irrigation practices that reduce on-farm water use?	10 Point(s)
3. c. Implementing practices in an area where the applicant participates in a geographically established or watershed-wide project?	10 Point(s)
3. d. Implementing practices that reduce on-farm water use as a result of changing to crops with lower water consumptive use, the rotation of crops, or the modification of cultural operations?	10 Point(s)
Air Quality - Will the proposed project improve air quality by: (select all that apply)	
4. a. Meeting on-farm regulatory requirements relating to air quality or proactively avoid the need for regulatory measures?	10 Point(s)
4. b. Implementing practices that reduce on-farm emissions of particulate matter (PM2.5, PM10)?	10 Point(s)
4. c. Implementing practices that reduce on-farm generated greenhouse gases such as carbon dioxide (CO2), methane (CH4), and nitrous oxide (N2O)?	10 Point(s)
4. d. Implementing practices that increase on-farm carbon sequestration?	10 Point(s)
Soil Health:- Will the proposed project improve soil health by: (select all that apply)	
5. a. Reduce erosion to tolerable limits (Soil "T")?	10 Point(s)
5. b. Increasing organic matter and carbon content, and improving soil tilth and structure?	10 Point(s)
Wildlife Habitat – Will the proposed project improve wildlife habitat by: (select all that apply)	
6. a. Implementing practices benefitting threatened and endangered, at-risk, candidate, or species of concern.	10 Point(s)
6. b. Implementing practices that retain wildlife and plant habitat on land exiting the Conservation Reserve Program (CRP) or other set-aside program?	10 Point(s)
6. c. Implementing practices benefitting honey bee populations or other pollinators?	10 Point(s)
6. d. Implementing land-based practices that improve habitat for aquatic wildlife?	10 Point(s)

Plant and Animal Communities: Will the proposed project improve plant and animal communities by: (select all that apply)	
7. a. Implementing practices that result in the management control of noxious or invasive plant species on non-cropland?	10 Point(s)
7. b. Implementing practice in an Integrated Pest Management Plan (IPM)?	10 Point(s)
Energy Conservation– Will the proposed project reduce energy use by: (select all that apply)	
8. a. Reducing on-farm energy consumption?	10 Point(s)
8. b. Implementing practice(s) identified in an approved AgEMP or energy audit, which meet ASABE S612 criteria?	10 Point(s)
Business Lines – Will the practices to be scheduled in the “EQIP Plan of Operations” result in:	
9. a. Enhancement of existing conservation practice(s) or conservation systems already in place at the time the application is received?	10 Point(s)

**State Issues Addressed**

<b>Issue Questions</b>	<b>Responses</b>
1. Is the program application to support the development of a Conservation Activity Plan (CAP)? If answer is “Yes”, do not answer any other state level questions. If answer is “No”, proceed with evaluation to address the remaining <u>questions in this section.</u>	250 Point(s)
2. Will the treatment you intend to implement using EQIP result in the protection and improvement to the resource base on all grazing <u>lands in the contract?</u>	24 Point(s)
3. Will the treatment you intend to implement using EQIP result in improved soil quality with the use of either no-till or a resource conserving crop rotation on at least 50% of the land in the contract? See CSP enhancement CCR99 for conserving crop rotation definition.	16 Point(s)
4. Will the treatment you intend to implement using EQIP result in improved water quality?	14 Point(s)
5. Does the applicant who is applying for EQIP qualify for Limited Resource status?	24 Point(s)

6. Will the treatment you intend to implement using EQIP result in the use of variable rate technologies for nutrient application using computer controlled equipment that adjusts fertilizer application based on management zones or grids?	5 Point(s)
7. Will the treatment you intend to implement using EQIP directly benefit a Federal or State listed, threatened, endangered or candidate species as identified in the State wildlife plan (Nebraska Natural Legacy Project)?	26 Point(s)
8. Will the treatment you intend to implement using EQIP result in a considerable reduction in an invasive plant species which has been identified as a statewide concern?	11 Point(s)
9. Will the treatment you intend to implement using EQIP result in the collection and use of livestock manure or city sludge from a CNMP for beneficial uses?	10 Point(s)
10. Will the treatment you intend to implement using EQIP result in wetlands being created, restored or enhanced?	9 Point(s)
11. Will the treatment you intend to implement using EQIP identified in an air quality assessment which will result in improved air quality?	5 Point(s)
12. Will the treatment you intend to implement using EQIP result in pollinator habitat being created or improved? Practice applied result in plantings which include milkweed species among a diverse mix of flowering plants. (Practice 327 Conservation Cover, Pollinator criteria as noted in 645 Upland Wildlife Habitat Management)	9 Point(s)
13. Will the treatment you intend to implement using EQIP result in a tree and/or shrub planting for conservation purposes?	11 Point(s)
14. Will the treatment you intend to implement using EQIP be applied on recently expired CRP, maintaining the CRP cover for the purpose of wildlife habitat, grazing or haying?	31 Point(s)
15. Will the irrigation system improvement you intend to implement using EQIP result in estimated water savings of at least 40% if located within an over appropriated river basin?	9 Point(s)

16. If the applicant who is applying for EQIP is also a previous/present contract holder or has been associated with a contract, has the applicant ever had a contract out of compliance or modified to reschedule a practice without a meritorious reason? Meritorious reason examples include personal hardship, adverse weather conditions, etc.	-25 Point(s)
17. Will the treatment you intend to implement using EQIP result in wind and water erosion control to "T" on all cropland in the contract?	26 Point(s)
18. Is the treatment you intend to implement identified in an current farm plan?	15 Point(s)
19. Will the treatment you intend to implement support the National Soil Health Initiative by including all five of the soil health practices: 1) cover crops (340); 2) no-till (329); 3) conservation crop rotation (328); 4) nutrient management (590); and integrated pest management (595)? If yes do not answer questions 20 and 21.	15 Point(s)
20. Will the treatment you intend to implement support the National Soil Health Initiative by including three of the five soil health practices: 1) cover crops (340); 2) no-till (329); 3) conservation crop rotation (328); 4) nutrient management (590); and integrated pest management (595)? If yes do not answer questions 19 and 21.	10 Point(s)
21. Will the treatment you intend to implement support the National Soil Health Initiative by including at least one of the five soil health practices: 1) cover crops (340); 2) no-till (329); 3) conservation crop rotation (328); 4) nutrient management (590); and integrated pest management (595)? If yes do not answer questions 19 and 20.	5 Point(s)

**Local Issues Addressed**

<b>Issue Questions</b>	<b>Responses</b>
Is the program application to support the development of a Conservation Activity Plan (CAP)?	
1. Is the program application to support the development of a Conservation Activity Plan (CAP)? If answer is "Yes", do not answer any other local level questions. If answer is "No", proceed with evaluation to address the remaining questions in this section.	400 Point(s)

Will the treatment you intend to implement using EQIP result in conversion from irrigated land to non-irrigated cropland on:	
2. 13% or greater of total cropland in the contract? ((non-irrigated cropland / total cropland in contract) * 100)	18 Point(s)
3. 10.00 - 12.99% of total cropland in the contract? ((non-irrigated cropland / total cropland in contract) * 100)	14 Point(s)
4. 7.00 - 9.99% of total cropland in the contract? ((non-irrigated cropland / total cropland in contract) * 100)	10 Point(s)
5. 3.00 - 6.99% of total cropland in the contract? ((non-irrigated cropland / total cropland in contract) * 100)	6 Point(s)
6. 0.01 - 2.99% of total cropland in the contract? ((non-irrigated cropland / total cropland in contract) * 100)	2 Point(s)
Will the treatment you intend to implement using EQIP result in conversion from irrigated land to non-irrigated permanent vegetation on:	
7. 13% or greater of total land in the contract? ((non-irrigated permanent vegetation / total land in contract) * 100)	35 Point(s)
8. 10.00 - 12.99% of total land in the contract? ((non-irrigated permanent vegetation / total land in contract) * 100)	29 Point(s)
9. 7.00 - 9.99% of total land in the contract? ((non-irrigated permanent vegetation / total land in contract) * 100)	23 Point(s)
10. 3.00 - 6.99% of total land in the contract? ((non-irrigated permanent vegetation / total land in contract) * 100)	17 Point(s)
11. 0.01 - 2.99% of total land in the contract? ((non-irrigated permanent vegetation / total land in contract) * 100)	9 Point(s)
Will the treatment you intend to implement using EQIP result in irrigation system efficiency improvements by:	
12. Converting a gravity irrigation system with standard gated pipe to a gravity irrigation system with a surge valve?	1 Point(s)
13. Converting a sprinkler irrigation system with higher pressure nozzles to a sprinkler irrigation system with lower pressure nozzles?	3 Point(s)
14. Converting an existing gravity irrigation system to a low pressure sprinkler system?	13 Point(s)

Will the treatment you intend to implement using EQIP result in the installation of a low pressure sprinkler system where the:	
15. Pivot travels a 360 degree full circle?	126 Point(s)
16. Pivot travels a 315-359 degree partial circle?	85 Point(s)
17. Pivot travels a 270-314 degree partial circle?	44 Point(s)
18. Pivot travels a 225-269 degree partial circle?	5 Point(s)
19. Pivot travels a 180-224 degree partial circle?	1 Point(s)
Will the treatment you intend to implement using EQIP:	
22. Be located within a TBNRD resource concern area? (Water Short Township or Republican River Basin)	12 Point(s)
23. Improve irrigation efficiency by utilizing soil moisture monitoring techniques on each sprinkler or gravity irrigation system in the contract?	7 Point(s)
24. Result in no-till with no row cultivation and no more than 25% total ground disturbance related to fertilizing, planting, pivot tracks, etc. on all cropland in the contract?	9 Point(s)
25. Result in no conversion from irrigated land to non-irrigated land?	-50 Point(s)
Will the treatment you intend to implement using EQIP result in conversion from non-irrigated land to irrigated land on:	
26. 0.01 - 3.00% of total irrigated land in the contract? ((new irrigated land / total irrigated land in contract) * 100)	-6 Point(s)
27. 3.01 - 5.00% of total irrigated land in the contract? ((new irrigated land / total irrigated land in contract) * 100)	-21 Point(s)
Will the treatment you intend to implement using EQIP result in a Cover Crop being implemented?	
28. Will the treatment you intend to implement using EQIP result in a Cover Crop being implemented?	5 Point(s)
Does the applicant applying for EQIP qualify as a beginning farmer?	
29. Does the applicant applying for EQIP qualify as a beginning farmer?	3 Point(s)

National Priorities Addressed

Issue Questions	Responses
If the application is for development of a Conservation Activity Plan (CAP), the agency will assign significant ranking priority and conservation benefit by answering “Yes” to the following question. Answering “Yes” to question 1a will result in the application being awarded the maximum amount of points that can be earned for the national priority category.	
1. a. Is the program application to support the development of a Conservation Activity Plan (CAP)? If answer is “Yes”, do not answer any other national level questions. If answer is “No”, proceed with evaluation to address the remaining questions in this section.	250 Point(s)
Water Quality Degradation – Will the proposed project improve water quality by: (select all that apply)	
2. a. Implementing the practices in a Comprehensive Nutrient Management Plan (CNMP)?	15 Point(s)
2. b. Implementing the practices in a Nutrient Management Plan (NMP)?	10 Point(s)
2. c. Reducing impacts from sediment, nutrients, salinity, or pesticides on land adjoining a designated “impaired water body” (TMDL, 303d listed waterbody, or other State designation)?	10 Point(s)
2. d. Reducing the impacts from sediment, nutrients, salinity, or pesticides in a “non-impaired water body”?	10 Point(s)
2. e. Implementing practices that improve water quality through animal mortality and carcass management?	10 Point(s)
Water Conservation – Will the proposed project conserve water by: (select all that apply)	

3. a. Implementing irrigation practices that reduce aquifer overdraft.	15 Point(s)
3. b. Implementing irrigation practices that reduce on-farm water use?	10 Point(s)
3. c. Implementing practices in an area where the applicant participates in a geographically established or watershed-wide project?	10 Point(s)
3. d. Implementing practices that reduce on-farm water use as a result of changing to crops with lower water consumptive use, the rotation of crops, or the modification of cultural operations?	10 Point(s)
Air Quality - Will the proposed project improve air quality by: (select all that apply)	
4. a. Meeting on-farm regulatory requirements relating to air quality or proactively avoid the need for regulatory measures?	10 Point(s)
4. b. Implementing practices that reduce on-farm emissions of particulate matter (PM2.5, PM10)?	10 Point(s)
4. c. Implementing practices that reduce on-farm generated greenhouse gases such as carbon dioxide (CO2), methane (CH4), and nitrous oxide (N2O)?	10 Point(s)
4. d. Implementing practices that increase on-farm carbon sequestration?	10 Point(s)
Soil Health:- Will the proposed project improve soil health by: (select all that apply)	
5. a. Reduce erosion to tolerable limits (Soil "T")?	10 Point(s)
5. b. Increasing organic matter and carbon content, and improving soil tilth and structure?	10 Point(s)
Wildlife Habitat – Will the proposed project improve wildlife habitat by: (select all that apply)	
6. a. Implementing practices benefitting threatened and endangered, at-risk, candidate, or species of concern.	10 Point(s)
6. b. Implementing practices that retain wildlife and plant habitat on land exiting the Conservation Reserve Program (CRP) or other set-aside program?	10 Point(s)
6. c. Implementing practices benefitting honey bee populations or other pollinators?	10 Point(s)
6. d. Implementing land-based practices that improve habitat for aquatic wildlife?	10 Point(s)

Plant and Animal Communities: Will the proposed project improve plant and animal communities by: (select all that apply)	
7. a. Implementing practices that result in the management control of noxious or invasive plant species on non-cropland?	10 Point(s)
7. b. Implementing practice in an Integrated Pest Management Plan (IPM)?	10 Point(s)
Energy Conservation– Will the proposed project reduce energy use by: (select all that apply)	
8. a. Reducing on-farm energy consumption?	10 Point(s)
8. b. Implementing practice(s) identified in an approved AgEMP or energy audit, which meet ASABE S612 criteria?	10 Point(s)
Business Lines – Will the practices to be scheduled in the “EQIP Plan of Operations” result in:	
9. a. Enhancement of existing conservation practice(s) or conservation systems already in place at the time the application is received?	10 Point(s)

**State Issues Addressed**

(Practice 327 Conservation Cover, Pollinator criteria as noted in 645 Upland Wildlife Habitat Management)	9 Point(s)
13. Will the treatment you intend to implement using EQIP result in a tree and/or shrub planting for conservation purposes?	11 Point(s)
14. Will the treatment you intend to implement using EQIP be applied on recently expired CRP, maintaining the CRP cover for the purpose of wildlife habitat, grazing or haying?	31 Point(s)
15. Will the irrigation system improvement you intend to implement using EQIP result in estimated water savings of at least 40% if located within an over appropriated river basin?	9 Point(s)

16. If the applicant who is applying for EQIP is also a previous/present contract holder or has been associated with a contract, has the applicant ever had a contract out of compliance or modified to reschedule a practice without a meritorious reason? Meritorious reason examples include personal hardship, adverse weather conditions, etc.	-25 Point(s)
17. Will the treatment you intend to implement using EQIP result in wind and water erosion control to "T" on all cropland in the contract?	26 Point(s)
18. Is the treatment you intend to implement identified in an current farm plan?	15 Point(s)
19. Will the treatment you intend to implement support the National Soil Health Initiative by including all five of the soil health practices: 1) cover crops (340); 2) no-till (329); 3) conservation crop rotation (328); 4) nutrient management (590); and integrated pest management (595)? If yes do not answer questions 20 and 21.	15 Point(s)
20. Will the treatment you intend to implement support the National Soil Health Initiative by including three of the five soil health practices: 1) cover crops (340); 2) no-till (329); 3) conservation crop rotation (328); 4) nutrient management (590); and integrated pest management (595)? If yes do not answer questions 19 and 21.	10 Point(s)
21. Will the treatment you intend to implement support the National Soil Health Initiative by including at least one of the five soil health practices: 1) cover crops (340); 2) no-till (329); 3) conservation crop rotation (328); 4) nutrient management (590); and integrated pest management (595)? If yes do not answer questions 19 and 20.	5 Point(s)

**Local Issues Addressed**

<b>Issue Questions</b>	<b>Responses</b>
1. Is the program application to support the development of a Conservation Activity Plan (CAP)? If answer is "Yes", do not answer any other local level questions. If answer is "No", proceed with evaluation to address the remaining questions in this section.	400 Point(s)
2. Will the treatment you intend to implement using EQIP result in Grazing Management where a season long grazing system is converted to a rotational system with facilitating practices?	35 Point(s)

3. Will the treatment you intend to implement using EQIP result in all soil erosion being adequately controlled?	50 Point(s)
4. Will the treatment you intend to implement using EQIP result in the establishment of wildlife habitat (conversion from cropland) using Upland Wildlife Habitat Management on at least 10% of the contract?	45 Point(s)
5. Will the treatment you intend to implement using EQIP result permanent vegetation established on all cropland in the contract?	45 Point(s)
6. Will the treatment you intend to implement using EQIP result in Cover Crops being planted on cropland in the contract?	30 Point(s)
7. Will the treatment you intend to implement using EQIP result in a rotation with 100% no-till on all cropland in the contract?	35 Point(s)
8. Will the treatment you intend to implement using EQIP result in Cover Crops being planted on all cropland HEL map units in the contract?	35 Point(s)
9. Will the treatment you intend to implement using EQIP result in grazing management using a rotation system with facilitating practices on all grazingland in the contract?	15 Point(s)
10. Will the treatment you intend to implement using EQIP result in grazing management using a season long grazing system with facilitating practices on all grazingland in the contract?	10 Point(s)
11. Will the treatment you intend to implement using EQIP result in 50% grassland managed primarily for wildlife habitat with no livestock grazing allowed during the primary nesting season?	20 Point(s)
12. Will the treatment you intend to implement using EQIP result in water runoff from all cropland being trapped or filtered with practices such as Field Borders, Filter Strips, Riparian Forest Buffers, Riparian Herbaceous Cover, Grassed Waterway, Diversion or Terrace - closed outlet only, Water and Sediment Control Basin?	25 Point(s)
13. Will the treatment you intend to implement using EQIP result in ----- Wetland Created (658) - Wetland functions and values are enhanced as outlined in wetlands plan?	5 Point(s)
14. Will the treatment you intend to implement using EQIP result in ----- Wetland Enhancement (659) - Wetland functions and values are enhanced as outlined in wetlands plan?	5 Point(s)

15. Will the treatment result in a reliable water source on all grazing land in the contract?	20 Point(s)
16. Will the treatment you intend to implement using EQIP result in all applicable cropland being terraced with HEL map units?	15 Point(s)
17. Do you qualify as a Beginning Farmer at FSA?	10 Point(s)

Issue Questions	Responses
If the application is for development of a Conservation Activity Plan (CAP), the agency will assign significant ranking priority and conservation benefit by answering “Yes” to the following question. Answering “Yes” to question 1a will result in the application being awarded the maximum amount of points that can be earned for the national priority category.	
1. a. Is the program application to support the development of a Conservation Activity Plan (CAP)? If answer is “Yes”, do not answer any other national level questions. If answer is “No”, proceed with evaluation to address the remaining questions in this section.	250 Point(s)
Water Quality Degradation – Will the proposed project improve water quality by: (select all that apply)	
2. a. Implementing the practices in a Comprehensive Nutrient Management Plan (CNMP)?	15 Point(s)
2. b. Implementing the practices in a Nutrient Management Plan (NMP)?	10 Point(s)
2. c. Reducing impacts from sediment, nutrients, salinity, or pesticides on land adjoining a designated “impaired water body” (TMDL, 303d listed waterbody, or other State designation)?	10 Point(s)
2. d. Reducing the impacts from sediment, nutrients, salinity, or pesticides in a “non-impaired water body”?	10 Point(s)
2. e. Implementing practices that improve water quality through animal mortality and carcass management?	10 Point(s)
Water Conservation – Will the proposed project conserve water by: (select all that apply)	

3. a. Implementing irrigation practices that reduce aquifer overdraft.	15 Point(s)
3. b. Implementing irrigation practices that reduce on-farm water use?	10 Point(s)
3. c. Implementing practices in an area where the applicant participates in a geographically established or watershed-wide project?	10 Point(s)
3. d. Implementing practices that reduce on-farm water use as a result of changing to crops with lower water consumptive use, the rotation of crops, or the modification of cultural operations?	10 Point(s)
Air Quality - Will the proposed project improve air quality by: (select all that apply)	
4. a. Meeting on-farm regulatory requirements relating to air quality or proactively avoid the need for regulatory measures?	10 Point(s)
4. b. Implementing practices that reduce on-farm emissions of particulate matter (PM2.5, PM10)?	10 Point(s)
4. c. Implementing practices that reduce on-farm generated greenhouse gases such as carbon dioxide (CO2), methane (CH4), and nitrous oxide (N2O)?	10 Point(s)
4. d. Implementing practices that increase on-farm carbon sequestration?	10 Point(s)
Soil Health:- Will the proposed project improve soil health by: (select all that apply)	
5. a. Reduce erosion to tolerable limits (Soil "T")?	10 Point(s)
5. b. Increasing organic matter and carbon content, and improving soil tilth and structure?	10 Point(s)
Wildlife Habitat – Will the proposed project improve wildlife habitat by: (select all that apply)	
6. a. Implementing practices benefitting threatened and endangered, at-risk, candidate, or species of concern.	10 Point(s)
6. b. Implementing practices that retain wildlife and plant habitat on land exiting the Conservation Reserve Program (CRP) or other set-aside program?	10 Point(s)
6. c. Implementing practices benefitting honey bee populations or other pollinators?	10 Point(s)
6. d. Implementing land-based practices that improve habitat for aquatic wildlife?	10 Point(s)

Plant and Animal Communities: Will the proposed project improve plant and animal communities by: (select all that apply)	
7. a. Implementing practices that result in the management control of noxious or invasive plant species on non-cropland?	10 Point(s)
7. b. Implementing practice in an Integrated Pest Management Plan (IPM)?	10 Point(s)
Energy Conservation– Will the proposed project reduce energy use by: (select all that apply)	
8. a. Reducing on-farm energy consumption?	10 Point(s)
8. b. Implementing practice(s) identified in an approved AgEMP or energy audit, which meet ASABE S612 criteria?	10 Point(s)
Business Lines – Will the practices to be scheduled in the “EQIP Plan of Operations” result in:	
9. a. Enhancement of existing conservation practice(s) or conservation systems already in place at the time the application is received?	10 Point(s)

**State Issues Addressed**

<b>Issue Questions</b>	<b>Responses</b>
1. Is the program application to support the development of a Conservation Activity Plan (CAP)? If answer is “Yes”, do not answer any other state level questions. If answer is “No”, proceed with evaluation to address the remaining <u>questions in this section.</u>	250 Point(s)
2. Will the treatment you intend to implement using EQIP result in the protection and improvement to the resource base on all grazing <u>lands in the contract?</u>	24 Point(s)
3. Will the treatment you intend to implement using EQIP result in improved soil quality with the use of either no-till or a resource conserving crop rotation on at least 50% of the land in the contract? See CSP enhancement CCR99 for conserving crop rotation definition.	16 Point(s)
4. Will the treatment you intend to implement using EQIP result in improved water quality?	14 Point(s)
5. Does the applicant who is applying for EQIP qualify for Limited Resource status?	24 Point(s)

6. Will the treatment you intend to implement using EQIP result in the use of variable rate technologies for nutrient application using computer controlled equipment that adjusts fertilizer application based on management zones or grids?	5 Point(s)
7. Will the treatment you intend to implement using EQIP directly benefit a Federal or State listed, threatened, endangered or candidate species as identified in the State wildlife plan (Nebraska Natural Legacy Project)?	26 Point(s)
8. Will the treatment you intend to implement using EQIP result in a considerable reduction in an invasive plant species which has been identified as a statewide concern?	11 Point(s)
9. Will the treatment you intend to implement using EQIP result in the collection and use of livestock manure or city sludge from a CNMP for beneficial uses?	10 Point(s)
10. Will the treatment you intend to implement using EQIP result in wetlands being created, restored or enhanced?	9 Point(s)
11. Will the treatment you intend to implement using EQIP identified in an air quality assessment which will result in improved air quality?	5 Point(s)
12. Will the treatment you intend to implement using EQIP result in pollinator habitat being created or improved? Practice applied result in plantings which include milkweed species among a diverse mix of flowering plants. (Practice 327 Conservation Cover, Pollinator criteria as noted in 645 Upland Wildlife Habitat Management)	9 Point(s)
13. Will the treatment you intend to implement using EQIP result in a tree and/or shrub planting for conservation purposes?	11 Point(s)
14. Will the treatment you intend to implement using EQIP be applied on recently expired CRP, maintaining the CRP cover for the purpose of wildlife habitat, grazing or haying?	31 Point(s)
15. Will the irrigation system improvement you intend to implement using EQIP result in estimated water savings of at least 40% if located within an over appropriated river basin?	9 Point(s)

16. If the applicant who is applying for EQIP is also a previous/present contract holder or has been associated with a contract, has the applicant ever had a contract out of compliance or modified to reschedule a practice without a meritorious reason? Meritorious reason examples include personal hardship, adverse weather conditions, etc.	-25 Point(s)
17. Will the treatment you intend to implement using EQIP result in wind and water erosion control to "T" on all cropland in the contract?	26 Point(s)
18. Is the treatment you intend to implement identified in an current farm plan?	15 Point(s)
19. Will the treatment you intend to implement support the National Soil Health Initiative by including all five of the soil health practices: 1) cover crops (340); 2) no-till (329); 3) conservation crop rotation (328); 4) nutrient management (590); and integrated pest management (595)? If yes do not answer questions 20 and 21.	15 Point(s)
20. Will the treatment you intend to implement support the National Soil Health Initiative by including three of the five soil health practices: 1) cover crops (340); 2) no-till (329); 3) conservation crop rotation (328); 4) nutrient management (590); and integrated pest management (595)? If yes do not answer questions 19 and 21.	10 Point(s)
21. Will the treatment you intend to implement support the National Soil Health Initiative by including at least one of the five soil health practices: 1) cover crops (340); 2) no-till (329); 3) conservation crop rotation (328); 4) nutrient management (590); and integrated pest management (595)? If yes do not answer questions 19 and 20.	5 Point(s)

**Local Issues Addressed**

<b>Issue Questions</b>	<b>Responses</b>
1. Is the program application to support the development of a Conservation Activity Plan (CAP)? If answer is "Yes", do not answer any other local level questions. If answer is "No", proceed with evaluation to address the remaining questions in this section.	400 Point(s)
2. Will the treatment you intend to implement using EQIP result in a conversion from season long grazing to a rotational grazing system with facilitating practices including invasive species control?	129 Point(s)

3. Will the treatment you intend to implement using EQIP result in a season long grazing with facilitating practices including invasive species control?	15 Point(s)
4. Will the treatment you intend to implement using EQIP result in an improvement to an existing rotational grazing system with facilitating practices including invasive species control?	100 Point(s)
5. Will the treatment you intend to implement using EQIP result in the implementation of conservation practices to all grazing land contract acres that provides reliable water sources with adequate capacity and distribution?	53 Point(s)
6. Will the treatment you intend to implement using EQIP result in meeting productivity, vigor and health quality criteria on all grassland in the contract?	25 Point(s)
7. Has the applicant attended a public education meeting regarding Invasive Plant Species Control sponsored by an NRD, Weed Management Area, NRCS or other conservation partner within the last three years?	11 Point(s)
8. Is a portion of the treatment area being supported by other sources of funding such as LB701, Nebraska Environmental Trust, Weed Management Area funds or other conservation partnership activities?	11 Point(s)
9. Is the applicant willing to allow their treatment area to be utilized by local groups or agencies (NRCS, NRD, SWWMA, schools, 4-H clubs, landowner tours, extensions specialists etc)?	9 Point(s)
10. Does the applicant have a signed treatment agreement with a local Weed Management Area?	16 Point(s)
11. Has the applicant received a direct benefit from improvements directly funded by LB701, Nebraska Environmental Trust, Weed Management Area or other sources?	11 Point(s)
12. Will the treatment you intend to implement using EQIP result in wetlands being restored or enhanced?	10 Point(s)
13. Do qualify as a Beginning Farmer at FSA?	10 Point(s)

**National Priorities Addressed**

Issue Questions	Responses
If the application is for development of a Conservation Activity Plan (CAP), the agency will assign significant ranking priority and conservation benefit by answering “Yes” to the following question. Answering “Yes” to question 1a will result in the application being awarded the maximum amount of points that can be earned for the national priority category.	
1. a. Is the program application to support the development of a Conservation Activity Plan (CAP)? If answer is “Yes”, do not answer any other national level questions. If answer is “No”, proceed with evaluation to address the remaining questions in this section.	250 Point(s)
Water Quality Degradation – Will the proposed project improve water quality by: (select all that apply)	
2. a. Implementing the practices in a Comprehensive Nutrient Management Plan (CNMP)?	15 Point(s)
2. b. Implementing the practices in a Nutrient Management Plan (NMP)?	10 Point(s)
2. c. Reducing impacts from sediment, nutrients, salinity, or pesticides on land adjoining a designated “impaired water body” (TMDL, 303d listed waterbody, or other State designation)?	10 Point(s)
2. d. Reducing the impacts from sediment, nutrients, salinity, or pesticides in a “non-impaired water body”?	10 Point(s)
2. e. Implementing practices that improve water quality through animal mortality and carcass management?	10 Point(s)
Water Conservation – Will the proposed project conserve water by: (select all that apply)	

3. a. Implementing irrigation practices that reduce aquifer overdraft.	15 Point(s)
3. b. Implementing irrigation practices that reduce on-farm water use?	10 Point(s)
3. c. Implementing practices in an area where the applicant participates in a geographically established or watershed-wide project?	10 Point(s)
3. d. Implementing practices that reduce on-farm water use as a result of changing to crops with lower water consumptive use, the rotation of crops, or the modification of cultural operations?	10 Point(s)
Air Quality - Will the proposed project improve air quality by: (select all that apply)	
4. a. Meeting on-farm regulatory requirements relating to air quality or proactively avoid the need for regulatory measures?	10 Point(s)
4. b. Implementing practices that reduce on-farm emissions of particulate matter (PM2.5, PM10)?	10 Point(s)
4. c. Implementing practices that reduce on-farm generated greenhouse gases such as carbon dioxide (CO2), methane (CH4), and nitrous oxide (N2O)?	10 Point(s)
4. d. Implementing practices that increase on-farm carbon sequestration?	10 Point(s)
Soil Health:- Will the proposed project improve soil health by: (select all that apply)	
5. a. Reduce erosion to tolerable limits (Soil "T")?	10 Point(s)
5. b. Increasing organic matter and carbon content, and improving soil tilth and structure?	10 Point(s)
Wildlife Habitat – Will the proposed project improve wildlife habitat by: (select all that apply)	
6. a. Implementing practices benefitting threatened and endangered, at-risk, candidate, or species of concern.	10 Point(s)
6. b. Implementing practices that retain wildlife and plant habitat on land exiting the Conservation Reserve Program (CRP) or other set-aside program?	10 Point(s)
6. c. Implementing practices benefitting honey bee populations or other pollinators?	10 Point(s)
6. d. Implementing land-based practices that improve habitat for aquatic wildlife?	10 Point(s)

Plant and Animal Communities: Will the proposed project improve plant and animal communities by: (select all that apply)	
7. a. Implementing practices that result in the management control of noxious or invasive plant species on non-cropland?	10 Point(s)
7. b. Implementing practice in an Integrated Pest Management Plan (IPM)?	10 Point(s)
Energy Conservation– Will the proposed project reduce energy use by: (select all that apply)	
8. a. Reducing on-farm energy consumption?	10 Point(s)
8. b. Implementing practice(s) identified in an approved AgEMP or energy audit, which meet ASABE S612 criteria?	10 Point(s)
Business Lines – Will the practices to be scheduled in the “EQIP Plan of Operations” result in:	
9. a. Enhancement of existing conservation practice(s) or conservation systems already in place at the time the application is received?	10 Point(s)

**State Issues Addressed**

<b>Issue Questions</b>	<b>Responses</b>
1. Is the program application to support the development of a Conservation Activity Plan (CAP)? If answer is “Yes”, do not answer any other state level questions. If answer is “No”, proceed with evaluation to address the remaining <u>questions in this section.</u>	250 Point(s)
2. Will the treatment you intend to implement using EQIP result in the protection and improvement to the resource base on all grazing <u>lands in the contract?</u>	24 Point(s)
3. Will the treatment you intend to implement using EQIP result in improved soil quality with the use of either no-till or a resource conserving crop rotation on at least 50% of the land in the contract? See CSP enhancement CCR99 for conserving crop rotation definition.	16 Point(s)
4. Will the treatment you intend to implement using EQIP result in improved water quality?	14 Point(s)
5. Does the applicant who is applying for EQIP qualify for Limited Resource status?	24 Point(s)

6. Will the treatment you intend to implement using EQIP result in the use of variable rate technologies for nutrient application using computer controlled equipment that adjusts fertilizer application based on management zones or grids?	5 Point(s)
7. Will the treatment you intend to implement using EQIP directly benefit a Federal or State listed, threatened, endangered or candidate species as identified in the State wildlife plan (Nebraska Natural Legacy Project)?	26 Point(s)
8. Will the treatment you intend to implement using EQIP result in a considerable reduction in an invasive plant species which has been identified as a statewide concern?	11 Point(s)
9. Will the treatment you intend to implement using EQIP result in the collection and use of livestock manure or city sludge from a CNMP for beneficial uses?	10 Point(s)
10. Will the treatment you intend to implement using EQIP result in wetlands being created, restored or enhanced?	9 Point(s)
11. Will the treatment you intend to implement using EQIP identified in an air quality assessment which will result in improved air quality?	5 Point(s)
12. Will the treatment you intend to implement using EQIP result in pollinator habitat being created or improved? Practice applied result in plantings which include milkweed species among a diverse mix of flowering plants. (Practice 327 Conservation Cover, Pollinator criteria as noted in 645 Upland Wildlife Habitat Management)	9 Point(s)
13. Will the treatment you intend to implement using EQIP result in a tree and/or shrub planting for conservation purposes?	11 Point(s)
14. Will the treatment you intend to implement using EQIP be applied on recently expired CRP, maintaining the CRP cover for the purpose of wildlife habitat, grazing or haying?	31 Point(s)
15. Will the irrigation system improvement you intend to implement using EQIP result in estimated water savings of at least 40% if located within an over appropriated river basin?	9 Point(s)

16. If the applicant who is applying for EQIP is also a previous/present contract holder or has been associated with a contract, has the applicant ever had a contract out of compliance or modified to reschedule a practice without a meritorious reason? Meritorious reason examples include personal hardship, adverse weather conditions, etc.	-25 Point(s)
17. Will the treatment you intend to implement using EQIP result in wind and water erosion control to "T" on all cropland in the contract?	26 Point(s)
18. Is the treatment you intend to implement identified in an current farm plan?	15 Point(s)
19. Will the treatment you intend to implement support the National Soil Health Initiative by including all five of the soil health practices: 1) cover crops (340); 2) no-till (329); 3) conservation crop rotation (328); 4) nutrient management (590); and integrated pest management (595)? If yes do not answer questions 20 and 21.	15 Point(s)
20. Will the treatment you intend to implement support the National Soil Health Initiative by including three of the five soil health practices: 1) cover crops (340); 2) no-till (329); 3) conservation crop rotation (328); 4) nutrient management (590); and integrated pest management (595)? If yes do not answer questions 19 and 21.	10 Point(s)
21. Will the treatment you intend to implement support the National Soil Health Initiative by including at least one of the five soil health practices: 1) cover crops (340); 2) no-till (329); 3) conservation crop rotation (328); 4) nutrient management (590); and integrated pest management (595)? If yes do not answer questions 19 and 20.	5 Point(s)

**Local Issues Addressed**

<b>Issue Questions</b>	<b>Responses</b>
1. Is the program application to support the development of a Conservation Activity Plan (CAP)? If answer is "Yes", do not answer any other local level questions. If answer is "No", proceed with evaluation to address the remaining questions in this section.	400 Point(s)
2. Will the treatment you intend to implement using EQIP result in Grazing Management where a season long grazing system is converted to a rotational system with facilitating practices?	100 Point(s)

3. Will the treatment you intend to implement using EQIP result in grazing management using a rotation system with facilitating practices on all grazingland in the contract?	57 Point(s)
4. Will the treatment you intend to implement using EQIP result in grazing management using a season long grazing system with facilitating practices on all grazingland in the contract?	5 Point(s)
5. Does the applicant who is applying for EQIP qualify for Limited Resource status?	30 Point(s)
6. Will the treatment you intend to implement using EQIP result in improved water quality?	23 Point(s)
7. Will the treatment you intend to implement using EQIP directly benefit a Federal or State listed, threatened, endangered or candidate species as identified in the State wildlife plan (Nebraska Natural Legacy Project)?	26 Point(s)
8. Will the treatment you intend to implement using EQIP result in a considerable reduction in an invasive plant species which has been identified as a statewide concern?	11 Point(s)
9. Will the treatment you intend to implement using EQIP result in the collection and use of livestock manure or city sludge from a CNMP for beneficial uses?	10 Point(s)
10. Will the treatment you intend to implement using EQIP result in wetlands being created, restored or enhanced?	13 Point(s)
11. Will the treatment you intend to implement using EQIP identified in an air quality assessment which will result in improved air quality?	8 Point(s)
12. Will the treatment you intend to implement using EQIP result in an improvement in forest health in an existing woodland resource?	9 Point(s)
13. Will the treatment you intend to implement using EQIP result in a tree and/or shrub planting for conservation purposes?	11 Point(s)
14. Will the treatment you intend to implement using EQIP be applied on recently expired CRP, maintaining the CRP cover for the purpose of wildlife habitat, grazing or haying?	31 Point(s)

15. If the applicant who is applying for EQIP is also a previous/present contract holder or has been associated with a contract, has the applicant ever had a contract out of compliance or modified to reschedule a practice without a meritorious reason? Meritorious reason examples include personal hardship, adverse weather conditions, etc.	-25 Point(s)
16. Will the treatment you intend to implement using EQIP result in wind and water erosion control to "T" on all cropland in the contract?	26 Point(s)
17. Will the treatment result in a reliable water source on all grazing land in the contract?	50 Point(s)
18. Will the treatment you intend to implement support the National Soil Health Initiative by including soil health practices such as cover crops (340), no-till (329), conservation crop rotation (328), nutrient management (590) and integrated pest management (595)?	15 Point(s)
