CONSERVATION PLANNING TECHNICAL NOTE NO. NM-1

SUBJECT: TECH – Distribution of Forestry Clipboards

Purpose: To distribute information to the field.

Expiration Date: December 31, 2007

The purpose of the clipboard is to facilitate forestry assistance to clients by NRCS and partner planners. The tables and diagrams on the clipboard follow the planning process and offer valuable information for working with clients. The clipboard has much of the same information found on the “forestry information stick” that has been produced in the past but is much easier to update with State or local modifications.

The tables and diagrams were printed with a color laser printer on heavy-weight Rite-in-the-Rain® paper (Item No. 8511, J.L. Darling Corporation; <http://www.riteintherain.com/>) that was inserted into a transparent clipboard (Item TA-1611 #481; available at GSA Advantage or <http://www.b3.net/customer/product.php?productid=481&cat=81&page=1>).

I am providing two forestry clipboards to each area office for distribution to planners working on forest land assistance. You will also be able to download the electronic version of the clipboard insert sheet from section I of the eFOTG conservation planning technical notes. Areas may modify the clipboard insert sheet as needed and may want to order additional clipboards to distribute within their Area.

/s/
