March 2, 2006

**NEW MEXICO RANGE TECHNICAL NOTE NO. 96**

**SUBJECT: ECS – COMMON RANGELAND PLANTS OF THE TEXAS  
PANHANDLE – ADDITIONAL PLANTS PAGES**

**Purpose:** To distribute Range Technical Note No. 96.

**Effective Date:** When received.

**Filing Instructions:** File in office reference library. This publication is not available on the web.

Attached is Range Technical Note 96. This publication is a joint effort between the North Rolling Plains RC and D office and Clint Rollins, NRCS Rangeland Management Specialist in Amarillo, Texas. A copy of this publication is being sent to all NM-NRCS field offices, soil survey offices, and area offices.

This is a significant amendment to this 2005 publication with many new plants pages being added. These additional pages must be added to the original book by placing them in alphabetical order by common name. If you need a reference sheet to achieve the correct order please see the new index at the end of this package for a complete list.

Attached to this list is a letter dated 02/06/2006 from John Crowell of North rolling Plains RC&D. In it he states that some of the updates were shipped miss-sorted. If you find you are in that condition when you add the new pages please call John Crowell for additions and replacements.

It is hoped this publication is an effective tool in communication with our clients.

GEORGE CHAVEZ  
State Resource Conservationist
