TECHNICAL GUIDE NOTICE

SUBJECT: Ohio Field Office Technical Guide, Section IV

The updated Conservation Practice Standard, Fencing (382) , has been posted to the Ohio NRCS e-FOTG website. The standard has been reformatted with individual files for each type of fence and its construction specifications, along with the main Fence standard. This format makes it easier for employees to provide landowners with the information they need for the specific type of fence to be installed. The new fence standards can be accessed through the following link:

<http://efotg.nrcs.usda.gov/treemenuFS.aspx?Fips=39049&MenuName=menuOH.zip>.

The full size CAD drawings for the new Single H-Brace Fence Details (OH-N-708-CAD) and the Double H-Brace Fence Details (OH-N-709-CAD), can be accessed on the Ohio website at: http://www.oh.nrcs.usda.gov/technical/engineering/cadd2_dwg_d_to_p.html .

If you have any questions regarding these new standards, please contact Art Brate, State Conservation Engineer, (614) 255-2480.
