

Source Data for the Official Soil Survey

Clinton County - General

The Clinton County soil survey was published in 1962 and is out of print. An update to the [Clinton County soil survey](#) was published in 2006 (available on-line) and is the official source of map unit descriptions and series descriptions. Clinton County was SSURGO certified in 2004. The SSURGO data is the official source of soil maps. The official source of soil data is in eFOTG. The spatial and tabular data may be downloaded from:

<http://soildatamart.nrcs.usda.gov/Enter.aspx?Page=Download&Survey=OH027&State=OH&Limit=InFrameOnly>

A web-based set of data is also available. Interpretation reports and data may be accessed at:

<http://soildatamart.nrcs.usda.gov/Enter.aspx?Page=Report&Survey=OH027&State=OH&Limit=No>

The data on these sites are the most current available.

Information from the updated soil survey is available from:

WILMINGTON FIELD OFFICE

Disclaimer

NRCS will not perform any evaluations of these data for purposes related solely to State or local regulatory programs.

The interpretations and analyses derived from these data do not eliminate the need for onsite sampling, testing, and detailed study of specific sites for intensive uses. Thus, these data and their interpretations are intended for planning purposes only. Files are dated and users are responsible for obtaining the latest version of the data.

Soil maps in the soil surveys may be copied or printed without permission. Enlargement of these maps, however, could cause misunderstanding of the detail of mapping. If the map is viewed or printed from an online or digital source, the viewing scale and printing scale may differ from the original publication scale. Please rely on the bar scale on each map sheet for proper map measurement.
