A revised "Suitability of Quarry Rock for Use as Riprap" table has been posted on e-FOTG. It can be viewed by clicking on the link on the right of the e-FOTG screen under "What's Changed Recently" or by clicking on the link in the menu under Section 1.; B. Reference Lists; 5. Geology; "Suitability of Quarry Rock for Use as Riprap (Table for use w/Tech. Note 2.)"

The only change made was adding Melvin Stone in Clinton County to the Dayton Area list.
