FIELD OFFICE TECHNICAL GUIDE NOTICE OK450-210

SUBJECT: Release new and revised Oklahoma Operations and Maintenance Plans for engineering conservation practices, Forage Harvest Management (511) standard Supplement No. 1, Irrigation Regulating Reservoir (JS 552), Irrigation System, Sprinkler (JS 442) job sheets, Pre-Approved Structures, Components, and Appurtenances List, and a revised Section IV Index.

Effective Date: Effective when received.

Explanation of Changes: Operation and maintenance plans have been developed and revised for a number of Oklahoma engineering standards. The service life for practices on the O & M plans has been adjusted to be consistent with the conservation practice software. The Forage Harvest Management (511) standard has been supplemented to include guidance for managed haying on CRP. A new job sheet for Irrigation Regulating Reservoir (JS 552) has been developed for welded steel tanks used in dust control sprinkler systems. A new job sheet for Irrigation System, Sprinkler (JS 442) has been developed for controlling dust from CAFOs. A revised pre-approved list for structures, components, and appurtenances has been developed to update the vendors list. Oklahoma Index for Section IV has been revised accordingly.

Filing Instructions: All the above documents can be accessed on the Oklahoma eFOTG website
