FIELD OFFICE TECHNICAL GUIDE NOTICE OK450-217

SUBJECT: Release revised practice standard for Nutrient Management (590), revised job sheets for Field Border (JS 386) and Nutrient Management (JS 590 01), revised statement of work for Nutrient Management (590), revised Oklahoma Phosphorus Assessment Worksheet, new Practice Documentation Requirements (PDR) for Terraces, release of new RUSLE2 version (1.26.6.4) and moses3A_107 database, revised Index – Section I Reference List and Oklahoma Index for Section IV.

Effective Date: Effective when received.

Explanation of Changes: The state standard for Nutrient Management (590) has been revised to reflect changes to the national standard. The job sheets for Field Border (JS 386) and Nutrient Management (JS 590 01) have been revised due to changes made in the standards. The Oklahoma Phosphorus Assessment Worksheet has also been revised to incorporate the changes made in the 590 standard. The Oklahoma Index for Section IV and Section I Index – Reference List has been revised to reflect these changes. The engineering section is developing Practice Documentation Requirements (PDR) for engineering practices. The PDR for Terraces (600) is the first to be completed. The PDR provides guidance to users in the design, construction, and checkout of conservation practices.

The new version of RUSLE2 (1.26.6.4 dated Nov. 13, 2006) is being installed by ITS on field office computers along with a new database (moses3A_107). ITS will not remove the old moses2A_1205 database on the S:\ drive currently in use at field offices. One new feature with this version of RUSLE2 is the incorporation of an energy use calculator into the program. The resource specialists have been advised of the RUSLE2 install and can provide assistance as needed.

Filing Instructions: All the above documents can be accessed on the Oklahoma eFOTG website.
