SUBJECT: Technical Guide Notice No. 106

DATE: 05/31/06

TO: All Holders of the PA Technical Guide

FILE CODE: 450-11

Purpose: To issue new PA591 Amendments for Treatment of Agricultural Waste, PA629 Waste Treatment, PA642 Water Well, and PA355 Water Well Testing.

Background: New standards have been issued to conform to corresponding standards in the National Handbook of Conservation Practices. Design and check Data Requirements, Specifications and Statements of Work have been included only for PA642. The other practices are for processes or products rather than installable facilities, and put the burden of documentation on the provider of the process or product. For PA591 and PA629, a protocol has been established to request review of proposed products and processes by the East Region National Technology Support Center. Those reviews will be requested through the State Office.

Filing Instructions: The new documents have been added to eFOTG, and the old version of PA642 has been deleted. An archive copy has been retained in the State Office. All other copies should be destroyed.
