SUBJ: TCH - TECHNICAL GUIDE NOTICE NO. 3 DATE: December 3, 1992

TO: All Holders of the Pennsylvania Soil and Water Conservation Technical Guide FILE CODE: 450-11

Purpose. To provide five revised standards and specifications, one new interim standard, replace a page in one standard, and make pen-and-ink changes to one standard and specification in Section IV.

The revised standards and specifications have been published in the two column format that was introduced with the updated Technical Guide earlier this year. All standards and specifications will be converted to this format as they are revised for other reasons.

Filing Instructions:

1. Remove and replace standards and specifications:

Access Road (560) dated 11/91  
Critical Area Planting (342) dated 11/92  
Streambank and Shoreline Protection (580) dated 11/91  
Subsurface Drain (606) dated 11/91

2. Insert in alphabetical sequence the interim Agrichemical Handling Facility (596) standard dated 10/91, which was adapted from the Northeast NTC interim standard. A regular standard and specification will be written when we have a national standard.
3. Make pen-and-ink revisions to the Section IV index, to add the interim standard and record the dates of the revised standards as shown above.
