SUBJ: TECHNICAL GUIDE NOTICE NO. 31

DATE: August 20, 1997

TO: All Holders of the PA  
Technical Guide

FILE CODE: 450-11

Purpose: To provide an updated standard for Spring Development (574). This practice was revised to address some past operation problems, to provide design references, and to conform to the new Technical Guide format. It also emphasizes that this standard does not include pipelines and troughs below the spring box.

A standard specification for this practice will be developed in the near future and provided to all TG holders.

Filing Instructions: Remove and replace any previous versions of Conservation Practice 574. Make a pen and ink change to the index to include this notice.
