SUBJ: TECHNICAL GUIDE NOTICE NO. 46

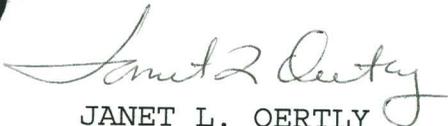

DATE: April 12, 1999

TO: All Holders of the PA  
Technical Guide

FILE CODE: 450-11

Purpose: To provide a new standard and specification for Conservation Practice 468A. These were developed to address waterways which are rock lined. In particular, the new sizing table in the standard should simplify the design procedure and improve the stability of in-place practices. A new Construction Guide is being developed which should also improve the inspection and installation of riprap. This will be sent under separate cover.

Filing Instructions: Add this standard and spec following Conservation Practice 468. Make a pen and ink change to the index to include this notice.
