

**NATURAL RESOURCES CONSERVATION SERVICE
CONSERVATION PRACTICE DOCUMENTATION REQUIREMENTS**

HERBACEOUS WEED CONTROL

**(Ac.)
CODE 315**

REQUIRED DOCUMENTATION

- A. Conservation Plan Map.
- B. Adequate inventory performed (SD-CPA-40 or other approved documentation).
- C. Herbaceous Weed Control 315 Job Sheet (SD-JS-315), NRCS-CPA-6 Planning Assistance Notes, and/or conservation plan practice narrative.

PLANNING REQUIREMENTS

“Plan Map” - complete Conservation Plan Map and other maps as required by SD planning policy.

SD-CPA-40 and/or other approved forms for documenting inventory of resources.

Herbaceous Weed Control 315 Job Sheet (SD-JS-315, producer signature is optional), NRCS-CPA-6 Planning Assistance Notes, and/or conservation plan practice narrative: Document the client’s planned weed control methods, including agent, timing, location, etc.

ANALYSE client’s planned weed control methods and assess for risk. Herbicide risks associated with the selected treatment should be evaluated using WIN-PST or other approved tools if applicable.

REVIEW with the client any identified risks and suggest possible alternatives if applicable.

PLAN with the client to mitigate risks of chosen weed control methods. If necessary, include maps showing buffers/setbacks for operations potentially affecting surface waters, and identify areas where leaching and/or runoff may be a concern.
