Certified By: ⁴	Signature	Date

¹Treatment Method(s) include(s) specific treatment methods, sequences of measures such as:

- Mechanical treatments (mowing, disking, cutting, etc.)
- Chemical treatments (refer to the current Pest Management Guides for Field Crops, Weed Control Guide for Pasture and Range, and/or Noxious Weed Control Guide published by South Dakota State University (SDSU)).
- Biological treatments (selected biological agents approved for use by the South Dakota Department of Agriculture and/or recommended for use by South Dakota State University (SDSU)).
- Targeted grazing (refer to Conservation Practice 528, Prescribed Grazing.)
- Prescribed burning (refer to Conservation Practice 338, Prescribed Burning) must have an approved burn plan developed on Form SD-ECS-9

²Specific herbicide rates and other details (refer to the current Pest Management Guides published by South Dakota State University (SDSU))
The Natural Resources Conservation Service does not endorse one product over another. Read and follow label directions. All laws, rules and regulations related to the herbicide use must be followed.

- For emergency information call the Poison Control Center for South Dakota at 1-800-222-1222
- For assistance with agrochemical spills, contact the South Dakota Department of Agriculture at 605-773-4432

³Windows/Pesticide Screening Tool (Win/PST) results and mitigation for loss potential.

⁴Monitoring: The length of the evaluation period will depend on weed species being monitored, method and materials used. At a minimum, site will be evaluated prior to certifying practice.
