

## **SECTION II - CROPLAND INTERPRETATIONS**

### **INTRODUCTION**

Information in this subsection can be used to plan the use and management of soils for crops or pasture. Conservation planners and others using this information can evaluate the effect of crop management systems on productivity and on the environment in all or part of the county. This information can be used to maintain or create a land use pattern that is in harmony with the natural soil.

**This subsection contains the following:**

Land Capability Classification by MLRA  
Crop Productivity Indexes  
Irrigation Design Groups
