SOUTH DAKOTA TECHNICAL GUIDE (SDTG)
NOTICE SD-390

SECTION I

Agronomy Technical Note No. 18. Assessing the Risk of Phosphorus Loss to South Dakota (SD) Surface Water Resources, has been updated in the Field Office Technical Guide (FOTG) under Section I, All Technical Notes, Agronomy. The following is an update to the first paragraph under "Planning Considerations."

- Calculate wind erosion using the Wind Erosion Prediction System (WEPS) for all fields with predominate soils having a Wind Erodibility Index (WEI) of 134 or greater, or if a wind erosion resource concern exists.

Agronomy Technical Note SD-2013-354, Assessing the Risk of Phosphorus Loss to SD Surface Water Resources, has been added in FOTG under Section I.

A handwritten signature in blue ink, appearing to read "Chad Kacir".

CHAD KACIR
State Conservationist
