**SOUTH DAKOTA TECHNICAL GUIDE (SDTG)
NOTICE SD-399**

SECTION I

The following Technical Note has been revised in the FOTG under Section I, All Technical Notes, Technology.

- Technology Technical Note No. 3 – Guidelines for Light Detection and Ranging (LiDAR) – Contour Intervals.

The reason for the revision is that the technical note was ambiguous as to the proper contour intervals to use when creating contours from LiDAR Digital Elevation Model (DEM).
