OPERATION AND MAINTENANCE ITEMS

Operation and maintenance (O&M) is necessary for all conservation practices and is required for all practices installed with the Natural Resources Conservation Service assistance. The land user is responsible for proper O&M throughout the life of the practice and as may be required by federal, state, or local laws or regulations.

Operation refers to operation of the practice in compliance with all laws, regulations, ordinances, and easements; and in such a manner that will result in the least adverse impact on the environment and will permit the practice to serve the purpose for which it was installed. Maintenance includes work to prevent deterioration of the practice, repairing damage, or replacing components which fail.

Necessary operation and maintenance items for this practice include:

- Periodically check gutters, downspouts, pipelines, trash guards, pumps, structures, and appurtenances for proper operation. Repair or replace if needed.
- Periodically remove debris from facilities.
- Protect downspouts from damage by livestock, equipment, and other hazards. Repair or replace damaged components.
