

**OPERATION AND MAINTENANCE  
Land Smoothing (466)  
Tennessee**

Landowner/Operator: \_\_\_\_\_

Practice Location: \_\_\_\_\_

County: \_\_\_\_\_ Farm/Tract Number: \_\_\_\_\_

Prepared By: \_\_\_\_\_ Date: \_\_\_\_\_

This land smoothing operation was designed and installed to remove irregularities in the fields. The estimated life span of this installation is at least 10 years. The life of this practice can be assured and possibly increased by performing operation and maintenance (O&M) activities.

This practice will require you to perform the O&M activities as listed below.

- Inspect after significant storm events and at least annually to identify repair and maintenance needs. Immediately repair any eroded areas and re-establish vegetative cover or erosion control measures.
- Avoid use of tillage equipment and operations that leave ridges or depressions that cannot be removed by subsequent tillage operations.
- Perform maintenance when needed to ensure that surface irregularities are maintained at the degree of smoothness required and field drainage pattern.
