

**STATEMENT OF WORK
IRRIGATION LAND LEVELING (464)
Texas**

for construction on

GENERAL REQUIREMENTS

1. All engineering documents, drawings, certifications and designs shall be sealed by a Professional Engineer licensed to practice engineering in Texas.
2. All drawings will be formatted for full size plots (22"x34") or when readable half size - 11" x 17" are acceptable.
3. All documentation shall be generated in *.doc, *.pdf, *.dwg, or .xls format.
4. Two Copies of all documentation shall be furnished, one for the landowner, one for USDA-NRCS records
5. All USDA-NRCS documentation shall be furnished to the local (county) NRCS Field Office.
6. All electronic files will be placed on CD/DVD media

Note: Site-Specific Deliverable may be added as appropriate by the State Conservation Engineer.

These deliverables apply to this individual practice. For other planned practice deliverables refer to those specific Statements of Work.

DESIGN

Deliverables:

1. Design documents that demonstrate criteria in practice standard have been met and are compatible with planned and applied practices
 - a. Practice purpose(s) as identified in the conservation plan.
 - b. List of required permits to be obtained by the client
 - c. Compliance with NRCS national and state utility safety policy (NEM part 503-Safety, Section 503.00 through 503.22) Completion of TX ENG 80A.
 - d. Practice standard criteria related computations and analyses to develop plans and specifications including but not limited to:
 - i. Field grades
 - ii. Soil Characteristics (e.g. texture, permeability, and depth
 - iii. Erosion Control
2. Written plans and specifications including sketches and drawings shall be provided to the client that adequately describes the requirements to install the practice and obtain necessary permits.
3. Operation and maintenance plan

**STATEMENT OF WORK
IRRIGATION LAND LEVELING (464)
Texas**

4. Certification that the design meets practice standard criteria and comply with applicable laws and regulations (NEM Subpart A, 505.03(b) (2)).
5. Design modifications during installation as required

Note: Site-Specific Deliverable may be added as appropriate by the State Conservation Engineer

INSTALLATION**Deliverables**

1. Pre-installation conference with client and contractor
2. Verification that client has obtained any required permits.
3. Completed TX-EN-80A and TX-EN-80B if any excavation occurs.
4. Staking and layout according to plans and specifications including applicable layout notes
5. Installation inspection
 - a. Actual materials used (Part 512, Subchapter D Quality Assurance Activities, 512.33)
 - b. Inspection records
6. Facilitate and implement required design modifications with client and original designer
7. Advise client/NRCS on compliance issues with all federal, state, tribal, and local laws, regulations and NRCS policies during installation
8. Certification that the installation process and materials meets design and permit requirements (NEM Subpart A, 505.03(c) (1)).

Note: Site-Specific Deliverable may be added as appropriate by the State Conservation Engineer.

CHECK OUT**Deliverables**

1. As-built documentation
 - a. Extent of practice units applied
 - b. Drawings
 - c. Final installed quantities
2. Certification that the installation meets NRCS standards and specifications and is in compliance with permits
3. Progress reporting

Note: Site-Specific Deliverable may be added as appropriate by the State Conservation Engineer.
