

**Pasture Enhancement Bundle –BPA10 (Improves forage utilization)**

**Enhancement Description**

This bundle of enhancement activities includes: ANM25-Stockpiling of forages to extend the grazing season; ANM29-On-farm forage based grazing system; ANM64-Managing livestock parturition to coincide with forage availability; PLT16-Intensive rotational grazing; and WQL07-Split nitrogen applications 50% after the crops/pasture emerge/green-up.

**Land Use Applicability**

Pastureland

**Benefits**

This bundle of enhancements is focused on activities that improve forage utilization for a longer period of the growing season while saving energy, protecting water quality and improving soil. Implementing these activities together creates a synergy that should result in more conservation benefits than might be expected from the individual activities. Applicants that choose to implement this bundle of activities will receive an increase in ranking and activity points.

**Conditions Where Enhancement Applies**

This enhancement applies to all pasture land use acres.

**Criteria**

Bundle rules

1. All of the activities in the bundle must be implemented. However, if an applicant is already implementing 1 or 2 of the activities, they are still eligible for the bundle and only need to implement the remaining 3 or 4 activities.
2. Applicants will be required to install all enhancements in the bundle wherever they are needed on the applied area.
3. Other enhancements cannot be substituted for those in the bundles.
4. Applicants choose the acres of their operation where they want to implement the bundle. If the applicant chooses to implement the activity on only a portion of their operation, their ranking and performance points will be reduced proportionally.
5. The amount of the bundle that can be scheduled cannot exceed the most limiting individual “system” enhancement scheduled.
