Prepared By _____ Date _____

OPERATION AND MAINTENANCE ITEMS

The obstruction removal activities were designed and carried out to remove and dispose of unwanted material. The estimated life span of these activities is at least 10 years. The life of this system can be assured and usually increased by carrying out a systematic maintenance program. Maintenance activities also apply to the disposal site.

This practice will require periodic maintenance to maintain satisfactory performance. Your maintenance program includes:

- The site shall be checked at least annually to ensure the site remains stable after the obstruction removal.
- The site shall be checked at least annually to ensure that the disposal site remains stable when disposal of debris occurs on site.
- Repair any problems as soon as possible.
- Erosion and sediment control practices shall be maintained, as needed, until the site(s) are stable.

Additional Operation and Maintenance Requirements Specific to this Plan: _____
