## 557 – Row Arrangement Implementation Requirements

### CRITERIA:

#### General Criteria Applicable to All Purposes

Row arrangement must be designed to accommodate the type and size of farm equipment to be used in the field.

#### Additional Criteria for Surface Drainage

Check if Applicable

As part of a surface drainage system, row arrangement must:

1. Conform to the NEH, Part 650, Engineering Field Handbook, Chapter 14, Water Management (Drainage) for the area regarding grade, depth, and permissible velocities.
2. Facilitate flow of excess water from the field into surface ditches.

#### Additional Criteria for Furrow Irrigation

Check if Applicable

As part of a furrow irrigation system, row arrangement must:

1. Conform to the irrigation guide for the area regarding grade and length.
2. Facilitate irrigation water management in the field.

#### Additional Criteria for Erosion Control and Water Conservation

Check if Applicable

As part of an erosion control and/or water conservation system for a field, row arrangement must:

1. Conform to the particular Conservation Practice Standard for the area (such as 449, Irrigation Water Management) for which row arrangement is a facilitating practice.
2. Conform to the grade and length requirements for Conservation Practice Standard 600, Terrace if the arrangement is used without another engineering practice.
