

STATEMENT OF WORK
Filter Strip (393)
Washington

These deliverables apply to this individual practice. For other planned practice deliverables refer to those specific Statements of Work.

DESIGN**Deliverables:**

1. Design documents that demonstrate criteria in NRCS practice standard have been met and are compatible with planned and applied practices
 - a. Practice purpose(s) as identified in the conservation plan.
 - b. List of required permits to be obtained by the client
 - c. List all required and/or facilitating practices
 - d. Practice standard criteria-related computations and analyses to develop plans and specifications including but not limited to:
 - i. Strip width, length and percent slope
 - ii. Size and percent slope of area contributing runoff to the filter strip
 - iii. Vegetative species selection
 - iv. Erosion calculations
2. Proper documentation of benchmark conditions.
3. Written plans and specifications including sketches and drawings shall be provided to the client that adequately describes the requirements to install the practice and obtain necessary permits. Plans and specification shall be developed in accordance with the requirements of conservation practice standard Filter Strip (Code 393) and documented on the 393 Implementation Requirements Document.
4. Operation and maintenance plan
5. Certification that the design meets practice standard criteria and comply with applicable laws and regulations documented on the 393 Implementation Requirements Document.
6. Design modifications during installation as required
7. Completion of Environmental Evaluation by responsible party. (NRCS-WA-CPA-052)

INSTALLATION**Deliverables**

1. Pre-installation conference with client
2. Verification that client has obtained required permits
3. Staking and layout according to plans and specifications including applicable layout notes
4. Installation guidance as needed
5. Facilitate and implement required design modifications with client and original designer
6. Advise client/NRCS on compliance issues with all federal, state, tribal, and local laws, regulations and NRCS policies during application
7. Certification that the installation process and materials meets design and permit requirements

CHECK OUT**Deliverables**

1. Records of installation
 - a. Extent of practice units applied.
 - b. Actual plant materials used
 - c. Trapping efficiency and life span documentation using Agronomy TN-2.
2. Certification that the installation meets NRCS standards and specifications and is in compliance with permits documented on the 393 Implementation Requirements Document.
3. All approved modification and updates to the original design are documented.
4. Progress reporting
