

# STATEMENT OF WORK

## CONTROLLED TRAFFIC FARMING (334)

### DESIGN

---

#### Deliverables:

1. Design documents that demonstrate criteria in NRCS practice standard have been met and are compatible with planned and applied practices.
  - a. Practice purpose(s) are identified and are compatible with the conservation plan.
  - b. Practice standard criteria-related computations and analyses to develop plans, specifications and operation and maintenance plan including but not limited to:
    - i. The field surface traffic is 33% or less determine using available tools.
    - ii. Row width of all crops planted are included in % field surface traffic.
    - iii. Width and spacing of tires/tracks of all equipment inventoried.
    - iv. Current percentage of field surface traffic that receives controlled traffic.
    - v. The planned percentage of field surface traffic recorded.
    - vi. Other requirements of the conservation practice standard 334 Controlled Traffic Farming recorded.
2. Certification that the design meets practice standard criteria and comply with applicable laws and regulations are documented in Job Sheet 334 Controlled Traffic Farming.
3. Design modifications during application as required.
4. Written plans and specifications including sketches and drawings shall be provided to the client that adequately describes the requirements to install the practice and obtain necessary permits are documented in Job Sheet 334 Controlled Traffic Farming.

### INSTALLATION

---

#### Deliverables

1. Application guidance as needed
2. Facilitate and implement required design modifications with client and original designer
3. Advise client/NRCS on compliance issues with all federal, state, tribal, and local laws, regulations and NRCS policies during installation

4. Certification that the application process meets design and permit requirements are documented in Job Sheet 334 Controlled Traffic Farming.

## **CHECK OUT**

---

### **Deliverables**

1. Records of application
  - a. Extent of practice units applied
  - b. Actual amount of residue present during critical period to meet targeted standard criteria
2. Certification that the application meets NRCS standards and specifications and is in compliance with permits in Job Sheet 334 Controlled Traffic Farming.
3. Progress reporting
