

WETLAND CREATION (658)

Wisconsin Statement of Work

DESIGN

Deliverables:

1. Design Survey – The following information should be obtained and recorded in the field notes:
 - a. Topographic information
 - b. Soils investigations
2. Design Data – The following information should be recorded in the design notes:
 - a. Purpose, goals, and objectives
 - b. Existing site properties and conditions
 - c. Analysis of the created wetland effects on water regimes
 - d. Analysis of soil investigation and geologic data
 - e. Hydraulic design
 - f. Water budget
 - g. Structural design of water level control
 - h. Embankment design
 - i. Wetland plant selection
 - j. Erosion control
 - k. Quantity computations
 - l. O&M plan
 - m. Cost estimate
 - n. Quality assurance plan
3. Drawings and Specifications – The conservation practice standard may contain a list of required items for inclusion in the plans and specifications. Typical contents include:
 - a. Location map
 - b. A plan view of the layout of the wetland and appurtenant features
 - c. Typical profiles and cross sections of the wetland and appurtenant features
 - d. Location of soil borings and plot of the soil/geologic boring log showing the USCS
 - e. Structure drawings for water level control
 - f. Wetland plant species
 - g. Wetland plant establishment requirements
 - h. Site specific construction requirements
 - i. Construction and material specifications
 - j. Quantities
 - k. Quality assurance plan
4. Certification that the design meets practice standard criteria and complies with applicable laws and regulations (NEM Part 505, Non-NRCS Engineering Services)

INSTALLATION

Deliverables:

1. Documentation of pre-construction conference with client and contractor
2. Verification that client has obtained required permits
3. Layout Survey Notes – The following information should be recorded in the field notes:
 - a. Location and alignment stakes
 - b. Grade stakes with offset reference stakes
 - c. Location of all appurtenances
 - d. Location of erosion control features
4. Compliance Checks – The complexity of the project will dictate the need for compliance checks during construction. All surveyed compliance checks shall be recorded in the field notes. Narratives of compliance checks shall be entered on a sheet in the field notes or the job diary. Compliance checks should include:
 - a. Material requirements according to the construction plan
 - b. Centerline profile (embankments)
 - c. Cross sections
 - d. Required elevations
 - e. Water level control components according to the construction plan
 - f. Adequacy of vegetation establishment
 - g. Adequacy of erosion control
 - h. Maintaining a job diary with the dates and record of inspections made, testing completed, instruction provided to the contractor, etc., to document compliance with standards and specifications
5. Facilitate, implement, and document required design modifications with client, original designer, permitting and funding agencies
6. Advise client/NRCS on compliance issues with all federal, state, tribal, and local laws, regulations and NRCS policies during installation
7. Certification that the installation process and materials meet design and permit requirements

CHECKOUT

Deliverables:

1. As-Built Documentation – As-Built documentation shall include:
 - a. As-Built plans showing all significant changes in linear measurements, alignment or design changes
 - b. The final quantities must be shown on the as-built drawing
 - c. Signed statement that the installed practice meets NRCS standards and specifications
 - d. Survey field notes
 - e. Job diary
 - f. Material compliance data
 - g. Photo of completed practice and any components
 - h. Practice location placed on the conservation plan map

2. Provide the following information to the NRCS field office servicing the relevant land unit for entry into the Performance Results System (PRS):
 - a. Technical Service Provider name
 - b. Customer name
 - c. USDA program funding the practice (if known)
 - d. Location of work (state, county, conservation district, land tract identifier)
 - e. Land use of field where the practice was installed (cropland, etc.)
 - f. NRCS practice name and quantity of practice installed in appropriate unit
