### Conditions of the Proposed Drainage Water Management Site

Select all that apply:

- Condition 1:  There is an existing patterned/parallel (not random) drainage system with laterals connected to tile submains or tile mains.
- Condition 2:  There is a drainage system map that includes the materials, diameters or dimensions, and locations of the laterals and mains.
- Condition 3:  Existing tile mains to be controlled are not shared by other landowners.
- Condition 4:  Field slope is 1 percent or less for at least 10 acres of the field in the area drained by the tile mains.
- Condition 5:  The water table may be elevated without having an adverse impact on adjoining properties.
- Condition 6:  There is NO existing subsurface drainage system **OR** there is an existing drainage system that will be disabled and a new subsurface drainage system installed.

### Applicable Practices for the Environmental Quality Incentives Program

Select one:

| Drainage Water Management Site Conditions   | Applicable Practices   |
|---|--|
| <input type="checkbox"/> Condition 4 or 5 <u>does not</u> apply.  | None   |
| <input type="checkbox"/> Conditions 1, 3, 4, and 5 apply.   | Conservation Activity Plan (130)   |
| <input type="checkbox"/> All of Conditions 1 through 5 apply.   | Conservation Activity Plan (130)<br>Drainage Water Management (554)<br>Structure for Water Control (587) |
| <input type="checkbox"/> Conditions 4, 5, and 6 apply.  | Conservation Activity Plan (130)   |
| <input type="checkbox"/> Conditions 4, 5, and 6 apply and IF a drainage water management plan that meets the criteria for CAP 130 is provided <u>prior</u> to the application ranking deadline. | Drainage Water Management (554)<br>Structure for Water Control (587)                                     |
