

# Producer Preparation for CNMP Interview

Have available farm copies of the following documents (if available):

## Existing Resource Protection Plans

- Current Conservation Plan (Based on RUSLE2 or SNAP+)
- Nutrient Management Plan
  - Soil test results
- Feed Management Plan
  - Current feed rations
  - Inventory of on-farm feed sources
- Prescribed Grazing Plan
- Pest Management Plan

## Supporting Documents

- DNR-issued permit for CAFO and/or livestock siting (if applicable)
- Construction plans and As-Built documentation for installed farmstead practices such as:
  - Manure storage
  - Waste/manure transfer
  - Barnyards
- Operations and Maintenance Plans for the practices listed above

## Maps

- Current crop field maps of the operation
- Manure spreading restriction maps
- Map or diagram of the farmstead with major structures and surface water conveyance practices labeled

## Worksheets to complete prior to interview (if provided with this document)

- CNMP contact information worksheet
- Draft Emergency response plan
- RUSLE2 Tillage and Rotation Inventory Worksheets
- Map(s) of farmstead to label buildings

## Be prepared to discuss

- Animal type, numbers, and size/age
- Total acres of crops grown by type and average long-term yields
- Supplemental feed purchases
- Tillage information
- Location of old, unused wells, sinkholes
- Wells (depth, gpm capacity, method of construction, results of water tests)
- Fuel and chemical storage (product type, type, capacity, and location to storage)
