

Wisconsin NRCS Threatened and Endangered Species Protection References

The Natural Resources Conservation Service – Wisconsin coordinates the protection of State Identified Threatened and Endangered species through the Wisconsin Department of Natural Resources Bureau of Natural Heritage Conservation. General information on Wisconsin DNR's Endangered Resources protection activities can be found on the following webpage:

<http://dnr.wi.gov/topic/endangeredresources/>

The official process and documentation for DNR to grant permission for landowners to carry out activities that have a low potential impact on T&E species without issuing an formal Incidental Take Permit can be found on the following webpage :Threatened and Endangered Species No/low Impact Activities

<http://dnr.wi.gov/topic/erreview/itnolowimpact.html>

A list of specific Wisconsin Natural Resources Conservation Service conservation practices that have been identified as have a NO/low Impact on T&E species can be found within Table 1, Section D beginning on Page 6 of 20 which can be found on the following webpage:

<http://dnr.wi.gov/topic/ERReview/documents/ActivityList.pdf>

Specific questions related to NRCS policy for the protection of Threatened and Endangered Species and the proper use of Table 1 Section D NO/low Impact on T&E species for the planning of NRCS conservation practices should be directed to: Steve Bertjens, Wisconsin NRCS State Biologist:
