WISCONSIN FIELD OFFICE TECHNICAL GUIDE
NOTICE FOTG WI-20

The following revisions to the Wisconsin FOTG have been posted on the Wisconsin e-FOTG website:

Section IV

- Index
- Standard 561, Heavy Use Area Protection
- Standard 558, Roof Runoff Structure
- Standard 580, Streambank and Shoreline Protection
- Specification 15, Plastic Pipe Conduits

Section IV

- Standard 561 has had minor revisions. The minimum wind and snow loads for roofs has been removed. The definitions of crushed stone and graded rock, in the footnotes of Table 1 were modified slightly.
- Standard 558 has been revised to include rainfall maps that are consistent with those in the AWMFH.
- Standard 580 has been revised by a Standards Oversight Council (SOC) team as a result of the development of the Wisconsin Department of Natural Resources Code NR-328 for shorelines and streambanks. Its charge is to integrate the state code and the standard. Companion documents are also being developed.
- Specification 15 has had a minor revision. An ASTM for PVC pipe was removed and a more current one added.

A link to the Wisconsin e-FOTG can be found on the Wisconsin NRCS web site at <http://www.wi.nrcs.usda.gov/>.
