**WISCONSIN FIELD OFFICE TECHNICAL GUIDE
NOTICE FOTG WI-31**

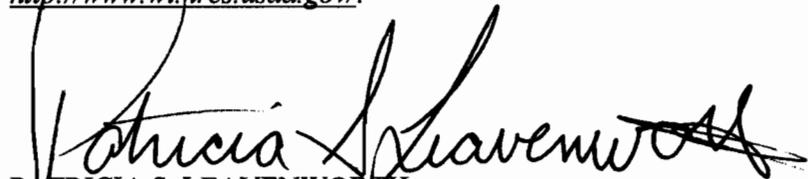

The following revisions to the Wisconsin FOTG have been posted on the Wisconsin e-FOTG website:

Section IV

- Index
- Standard 558, Roof Runoff Structure
- Specification 23, Aluminum or Steel Roof Gutters

The design tools team revised Standard 558 and created Specification 23 to strengthen the attachment of roof gutters to buildings. The Standards Oversight Council sent a notice on February 22, 2007, seeking comments on proposed revisions to Standard 558, Construction Specification 23, and related drawings. These comments were reviewed and incorporated by the design tools team. Specification 23 should be used with revised standard drawings 408A and 408B (1/08).

A link to the Wisconsin e-FOTG can be found on the Wisconsin NRCS web site at
