OPERATION AND MAINTENANCE REQUIREMENTS
IRRIGATION WATER MANAGEMENT
CODE 449

Landowner/Operator _____

County _____ CD _____ Farm/Tract No. _____

Prepared By _____ Date _____

This irrigation water management project was implemented to control the volume, frequency, and application of irrigation water. The estimated life span of the system is at least 1 year. The life of the practice can be assured and usually increased by developing and carrying out a systematic operation and maintenance program.

This practice requires periodic O&M to properly manage and keep the system in good repair. Items for consideration are:

- The irrigator will document all irrigation water management activities with adequate records. At a minimum:
 - Record each irrigation event, including the amount or depth of water applied and the date of application
 - Record the data from the method(s) used for determining the timing and amount of the irrigation event.

Additional Operation and Maintenance requirements specific to this plan:

Inspection Date	Items to be Repaired and Corrective Action Taken	Repair Date
