

## STATEMENT OF WORK Residue Management - Seasonal (344) West Virginia

**These deliverables apply to this individual practice. For other planned practice deliverables refer to those specific Statements of Work.**

### DESIGN

---

#### Deliverables:

1. Design documents that demonstrate criteria in NRCS practice standard have been met and are compatible with planned and applied practices
  - a. Practice purpose(s) as identified in the conservation plan.
  - b. List of required permits to be obtained by the client, if applicable.
  - c. List all required and/or facilitating practices
  - d. Practice standard criteria-related computations and analyses to develop plans and specifications including but not limited to:
    - i. Results of NRCS erosion prediction tools and other applicable technical tools to insure cropland is in compliance with Highly Erodible Land (HEL) requirements.
    - ii. Planned residue amount.
    - iii. Orientation of residue.
    - iv. Timing of soil disturbance.
2. Written plans and specifications shall be provided to the client that adequately describes the requirements to apply the practice and obtain necessary permits. Plans and specifications shall be in accordance with the requirements of the conservation practice standard for Residue Management Seasonal (Code 344).
3. Operation and maintenance plan.
4. Certification that the design meets practice standard criteria and comply with applicable laws and regulations
5. Design modifications during application as required

**Note:** Design of practice will be in compliance with practice standard and applicable criteria for the appropriate purpose(s). Practice specification will include the information listed in the "Plans and Specifications" and "Operation and Maintenance" section of the conservation practice standard. The design will document the clients decisions using narrative and/or jobsheet.

### INSTALLATION

---

#### Deliverables

1. Pre-implementation conference with client to review practice plan.
2. Verification that client has obtained required permits, if applicable.
3. Application guidance as needed.
4. Facilitate and implement required design modifications with client and original designer
5. Advise client/NRCS on compliance issues with all federal, state, tribal, and local laws, regulations and NRCS policies during application
6. Certification that the application process and materials meets design and permit requirements
7. Location of wetlands, water bodies, streams, and other nutrient sensitive areas.

**Note:** Provide written documentation of any modification of the approved design. Certify that the modification meets practice standard on appropriate NRCS form and/or letter of certification as applicable. At a minimum, documentation will include quantities and amounts. The location of the applied practice will be identified on the conservation plan map for non-structural practices.

**STATEMENT OF WORK**  
**Residue Management - Seasonal (344)**  
**West Virginia**

**CHECK OUT**

---

**Deliverables**

1. Records of implementation.
  - a. Extent of practice units applied.
  - b. Actual amount of residue present during critical period to meet standard criteria.
2. Record keeping shall be in accordance with the requirements of the conservation practice standard for Residue Management Seasonal (Code 344).
3. Certification that the application meets NRCS standards and plan specifications and is in compliance with permits.
4. Progress reporting.

**Note:** Meet with client to review practice operation and maintenance. Certify the conservation practice has been installed according to practice design and specifications using a letter of certification or appropriate NRCS form.
