West Virginia Technical Guide
Section IV
450-11
Notice No. 2-11

Nov. 19, 2010

Purpose: To inform field and area offices of new or revised conservation practices and materials within Section IV of the West Virginia electronic Field Office Technical Guide (eFOTG).

The documents listed below are new, revised or removed practice standards and associated materials. Previous versions of these documents are archived and should no longer be used for conservation planning.

Revise WV Practice Standards Table of Contents

WV Practice Standards Table of Contents, dated November 2010.

New , Revise or Remove WV Conservation Practice Standards

Remove: Terrace (600) – November 1996, due to lack of use or activity.

New , Revise or Remove Interim WV Conservation Practice Standards

Revise: Seasonal High Tunnel System For Crops (798) - November 2011

The purpose of the interim standard remains the same: to provide a simple structure for producers to use to extend the growing season. The purposes within the standard remain the same. The intention is not to build greenhouses. The definition of the practice has been revised to delete the verbiage relating to no electrical, heating or mechanical ventilation system. This will provide the opportunity for those producers who want to add the additional electrical, heaters and ventilation systems to do so at their own expense. Reference USDA NRCS National Bulletin: 450-11-5 dated October 19, 2011
