

CONSTRUCTION SPECIFICATIONS
Obstruction Removal (500)

_____	Land Owner	_____	Service Center
_____	County	_____	Date

1. SCOPE

The work shall consist of completion of removal of obstructions performed as outlined in this specification and the drawings.

2. SITE PREPARATION

Stake, flag and locate all areas and structures to be disturbed, relocated or removed according to the plans. Reshape and regrade so that the disturbed areas blend with the surrounding land features and conditions. Compact the fill areas according to the requirements in Section 3.

3. EARTHFILL

Earthfill is composed of natural earth materials that can be placed and compacted by construction equipment operated in a conventional manner. Fill material shall contain no frozen soil, sod, brush, construction debris, roots or rocks. Fill shall be compacted according to Class C compaction. The surface shall be shaped and graded to prevent ponding of surface water.

4. VEGETATION

Vegetation, if required, shall be established at the locations shown on the drawings and/or staked in the field. All disturbed areas shall be revegetated according to the recommendations for permanent seeding as stated in Conservation Practice Standard 342, Critical Area Planting or the Pennsylvania Agronomy Guide.

5. EROSION AND POLLUTION CONTROL

Construction operations will be carried out in such a manner that erosion and air and water pollution will be minimized. State and local laws concerning pollution abatement must be followed.

6. STRUCTURE REMOVAL

Reference the limits of the obstruction removal as shall be shown on the drawings. Do not disturb trees, wetlands, other structures or protected areas as designated on the drawings.

Adhere to the disposal methods and locate disposal areas as designated on the drawings. Finish grade of disposed excavated material fill placement and include the required compaction and moisture content as shown on the drawings.

7. UTILITIES

Verify all utilities have been properly notified, marked and posted, and turned off prior to commencing removal or obstructions.

8. ADDITIONAL CONDITIONS WHICH APPLY TO THIS PROJECT ARE:

_____ DWG,
