

CONSTRUCTION SPECIFICATION
Building Envelope Improvement (672)

_____ Landowner _____ Service Center

_____ County _____ Date

1. SCOPE

This Specification sets forth details necessary to meet the Building Envelope Improvement standard.

2. IMPLEMENTATION

Building Envelope Improvement measures implemented, including equipment and material, shall be of those included in a Type 2 energy audit and have similar potential energy savings. The energy audit shall have been completed according to the applicable Conservation Activity Plan and/or ASABE S612, Performing On-farm Energy Audits.

3. INSTALLATION

Installation shall conform to all applicable codes, laws and regulations.

4. SUBMITTALS

The Producer or Installer shall submit to the NRCS representative the equipment and materials necessary to complete items included in the energy audit for approval.

The Producer or Installer shall certify that the installation of all furnished equipment and material meets all codes, laws and regulations.

The Installer or Vendor shall furnish warranty certifications, spare parts lists, service bulletins/manuals, and instructions covering the operation and maintenance of the furnished equipment to the Producer.

5. INSPECTION OF RECORDS

NRCS shall have the right to inspect installed equipment and material throughout the life of this practice. For three years, NRCS shall have the right to review and inspect Producer records as outlined in Section 5 above.

ADDITIONAL CONDITIONS WHICH APPLY TO THIS PROJECT ARE:
