

Source of Official Soil Survey Data

General

Most of the private, state and Bureau of Land Management-administered (BLM) lands in this county is covered by four soil surveys: Soil Survey of Fremont County, East Part and Dubois Area, Wyoming; Soil Survey of Fremont County, Wyoming, Lander Area; Soil Survey of Fremont County, Wyoming, Riverton Area; and Soil Survey of Fremont County, Wyoming, Wind River Basin

The soil survey of the East Part and Dubois Area; Lander Area; and Riverton Area are published. These publications include soil map unit descriptions, series descriptions, tables of properties and interpretations for various uses, and soil maps. These publications are not considered the official soil data for the parts of the county covered by this publication.

The soil survey for the parts of the county covered by the Wind River Basin Area is not published. Only parts of this area have maps available. For areas that have soil maps completed, the available soil survey information includes soil map unit descriptions, series descriptions, tables of properties and interpretations for various uses, and soil maps. A copy of the draft unpublished hard copy maps can be obtained from the local county NRCS field office. An electronic download and reports of soil data and interpretations are available from the links within this web site.

The soil survey for the lands within the National Forests is not published. For areas within a national forest in this county, the local United States Forest Service office should be contacted to determine the availability of soil maps, data, and interpretations. NRCS has not designated an Official Data source for the lands within the national forest in this county and is not the primary steward or distributor of soil maps, soil data or interpretations for these lands. The NRCS does certify for any use the accuracy or suitability of the maps, data, or interpretations for soil survey data which the agency is not the steward even if the data was obtained from a NRCS source.

Source of Official Soil Survey Data

The tabular soil data from the Soil Data Mart (SDM) <http://soildatamart.nrcs.usda.gov> can be imported into a Microsoft Access database template. The template is available for download from SDM web site (<http://soildatamart.nrcs.usda.gov>).

The spatial data downloaded from the SDM requires the use of GIS software to view or print the maps.

For specific information or assistance in using the soil survey information, contact the NRCS Soils Staff at: (307) 233-6773 or (307) 233-6774.
