

STATEMENT OF WORK
IRRIGATION SYSTEM, SURFACE AND SUBSURFACE (443)
Wyoming

These deliverables apply to this individual practice. For other planned practice deliverables refer to those specific Statements of Work.

DESIGN

Deliverables:

1. Design documentation that will demonstrate that the criteria in NRCS practice standard have been met and are compatible with other planned and applied practices.
 - A. Practice purpose(s) as identified in the conservation plan
 - B. List of required permits to be obtained by the client
 - C. Compliance with NRCS national and state utility safety policy (NEM Part 503-Safety, Subpart A - Engineering Activities Affecting Utilities 503.00 through 503.06)
 - D. List of facilitating/component practices
 - E. Design Survey
 - i. Topographic surveys (as needed)
 - ii. Profile and alignment of conveyance
 - iii. Elevations and locations of water control structures
 - F. Practice standard criteria related computations and analyses to develop plans and specifications including but not limited to:
 - i. System Capacity
 - a. Type of soil
 - b. Water requirement and irrigation methods for crop involved
 - c. Location and design of measuring devices, division boxes, checks, erosion control structures, and method of conveyance.
 - ii. Delivery/application method
 - iii. Depth of Application, Rate, Frequency, and Uniformity
 - iv. Erosion/seepage control
 - v. Tailwater control
2. Written plans and specifications including sketches and drawings shall be provided to the client that adequately describes the requirements to install the practice and obtain necessary permits
 - A. Plan view of system
 - B. Profile and details for the conveyance system
 - C. Structural layout and details
 - D. Table of quantities
 - E. Location map
3. Operation and Maintenance Plan
4. Certification that the design meets practice standard criteria and comply with applicable laws and regulations (NEM Subpart A, 505.03 (a) (3)).
5. Design modifications during installation as required.

INSTALLATION

Deliverables

1. Pre Installation conference with client and contractor.
2. Verification that client has obtained required permits.
3. Staking and layout according to plans and specifications including applicable layout notes.
 - A. Refer to the record requirements for the type of conveyance system involved.
 - B. Structure location, alignment and reference stakes.
4. Installation inspection (according to inspection plan as appropriate).
 - A. Actual materials used (Part 512, Subpart D Quality Assurance Activities, 512.33)
 - B. Inspection records
5. Facilitate and implement required design modifications with client and original designer
6. Advise client/NRCS on compliance issues with all federal, state, tribal, and local laws, regulations and NRCS policies during installation.
7. Certification that the installation process and materials meets design and permit requirements.

STATEMENT OF WORK
IRRIGATION SYSTEM, SURFACE AND SUBSURFACE (443)
Wyoming

CHECK OUT

Deliverables

1. As-Built documentation.
 - A. Extent of practice units applied
 - B. Drawings
 - C. Final quantities
2. Certification that the installation meets NRCS standards and specifications and is in compliance with permits (NEM Subpart A, 505.03 (c) (1)).
3. Progress reporting.
