

**OPERATION AND MAINTENANCE PLAN
KARST SINKHOLE TREATMENT
CODE 527**

Landowner/Operator _____

Job Location _____

Prepared By _____ Date _____

OPERATION AND MAINTENANCE ITEMS

This karst sinkhole treatment was designed and installed to reduce contamination of groundwater resources and improve farm safety. The life of this treatment can be assured and usually increased by developing and carrying out an effective operation and maintenance program. An effective operation and maintenance program includes:

- Periodically inspect the treatment area, especially after rainfall events.
- Inspect and maintain vigorous growth of vegetative coverings in buffer around treatment area.
- Undesirable vegetation within the buffer area will be removed by mechanical means.
- Periodically inspect the components of the treatment system. Promptly repair or replace any components that are damaged.
