**Major changes to the Resource Concerns planning criteria**

NRCS adopted the restructured list of resource concerns and planning criteria in conjunction with the Conservation Delivery Streamlining Initiative (CDSI). The resource concerns will be integrated in Conservation Desktop and will be incorporated in the National Planning Procedures Handbook. The revised resource concerns and planning criteria are located in eFOTG, Section III, Guidance Documents and Section III, Conservation Planning Guide for RMS Plans.

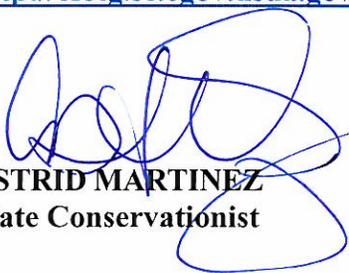

**Minor changes to the Resource Concerns planning criteria**

We will continue to use the legacy resource concerns and planning criteria for program application ranking in ProTracts during this transition year. The legacy resource concerns are located in eFOTG, Section III, Archive Materials folder.

**Effective Date:** This notice is effective when received.

**Filing Instructions:** The revised CAP technical criteria and revised resource concerns are electronically filed in the Wyoming eFOTG at this site:
